## AMEX Research Corporation Technologies

# AMRobot

## Educational mini-robot platform

### Assembly Guide

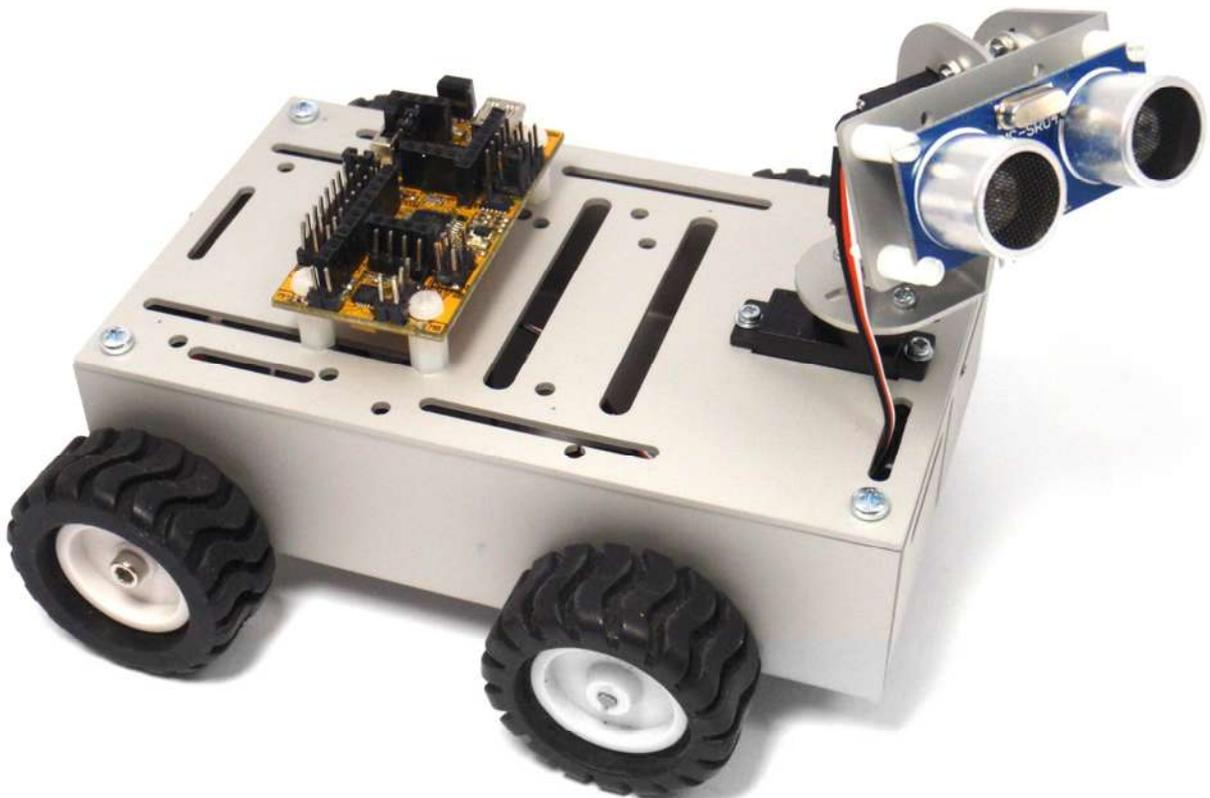

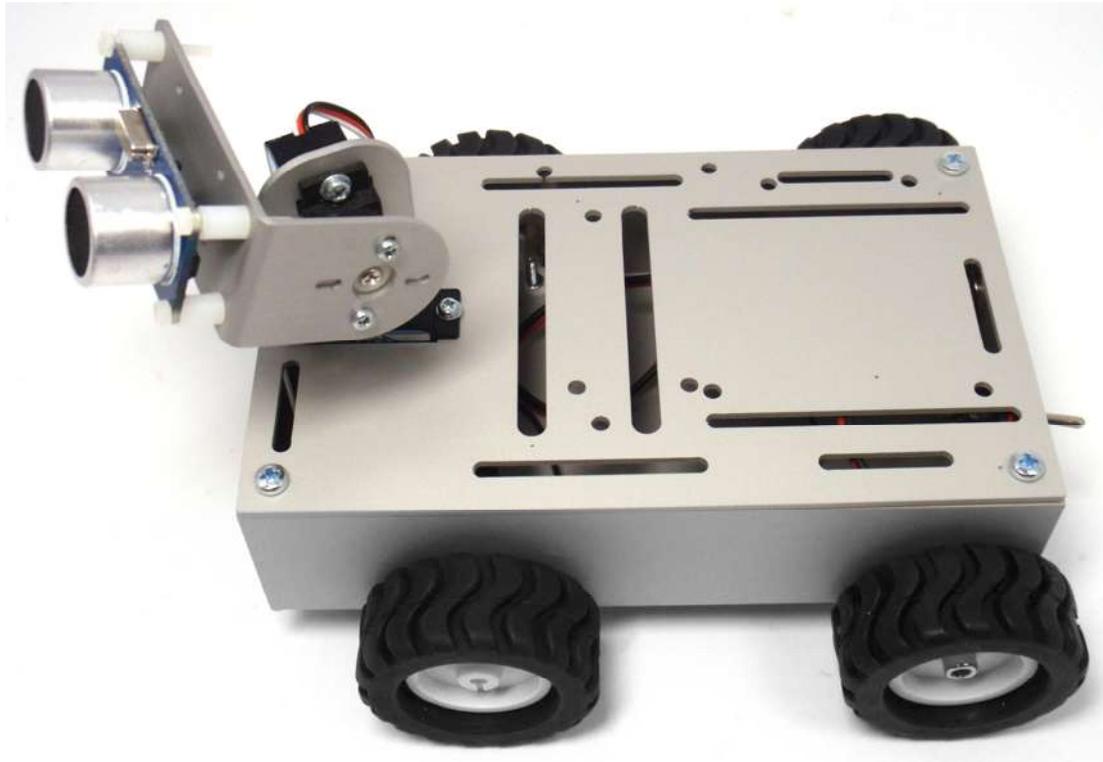

Document Date: 13 February 2015  
Document Revision: 2.0

Manufacturer:  
**AMEX Research Corporation Technologies**  
Address: PL 15-692 Bialystok,  
Elektronowa Str. 6, POLAND  
Tel.: +48 602723295, Fax: +48 856530703  
website: [www.amex.pl](http://www.amex.pl)  
e-mail: [amexinfo@amex.pl](mailto:amexinfo@amex.pl)

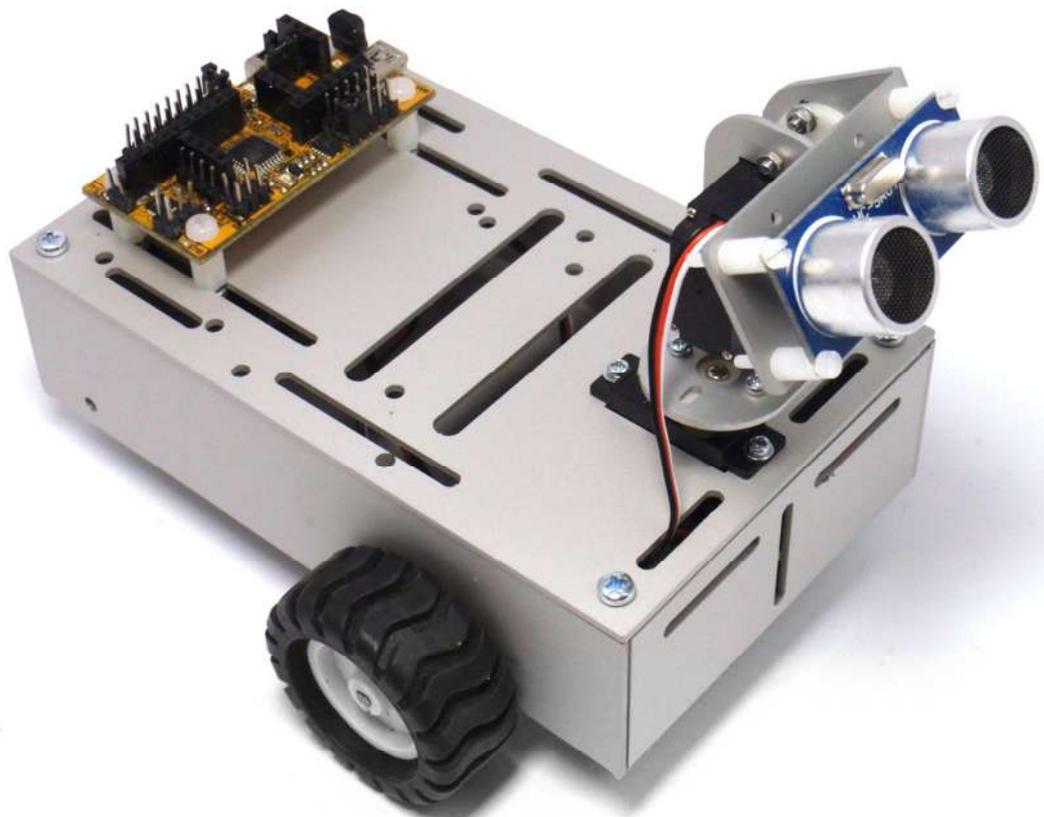

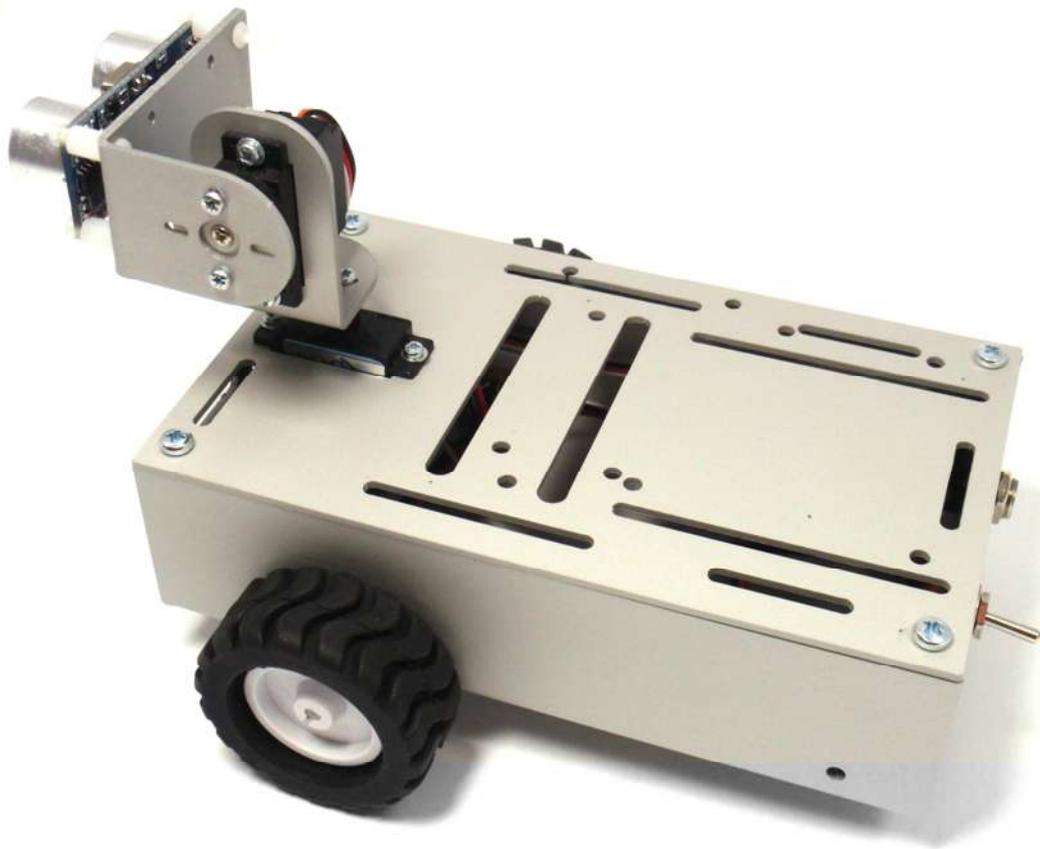

## Version 1

**Four-wheeled platform (2 active front wheels and 2 passive rear wheels)**

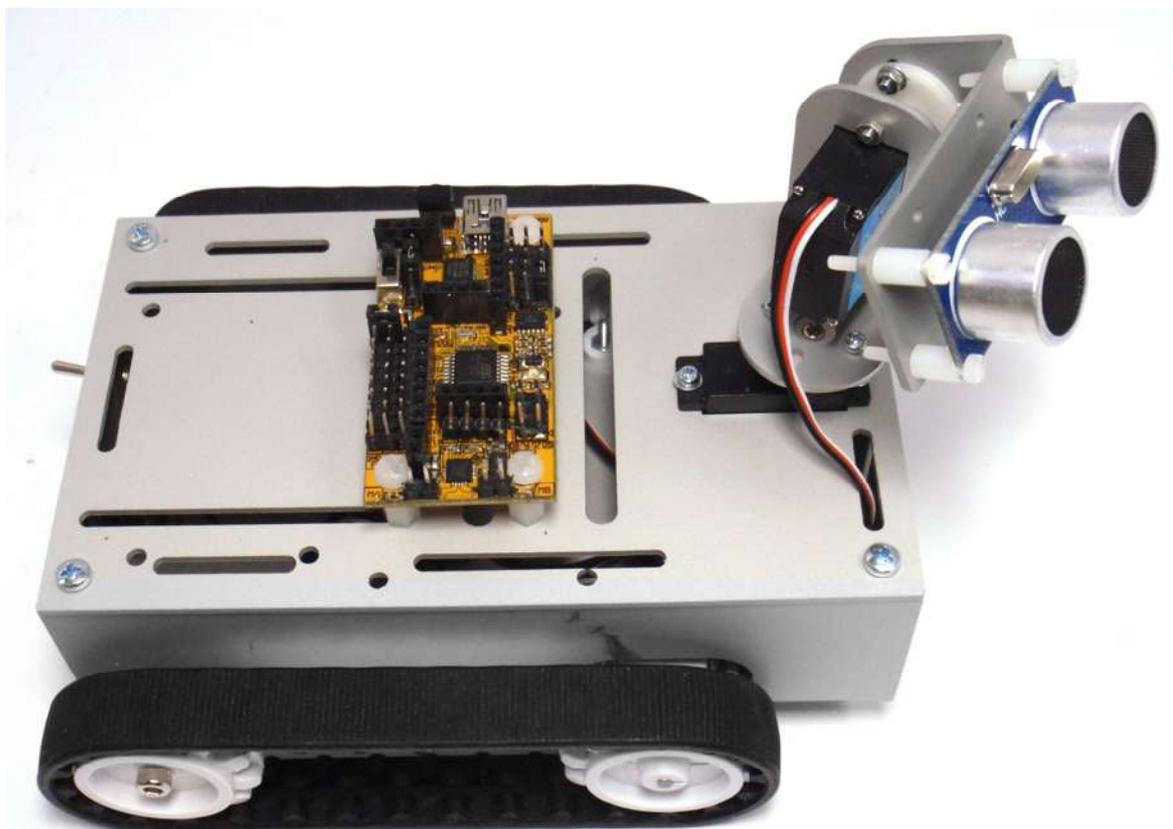

## Version 2

**Two-wheeled platform with supporting ball caster and two motors**

### Version 3

Platform with tracked drive system (two silicone tracks and two motors)

## AMRobot platform components (mechanical parts)

Mounting plates, components for the scanning device, power supply connector, switch and NiMH (6 x AA) battery container

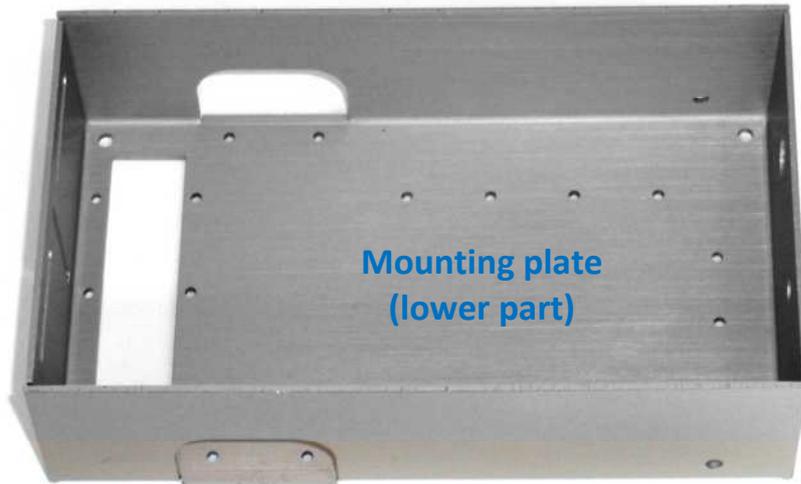

Servos for scanning device

Power supply connector and switch

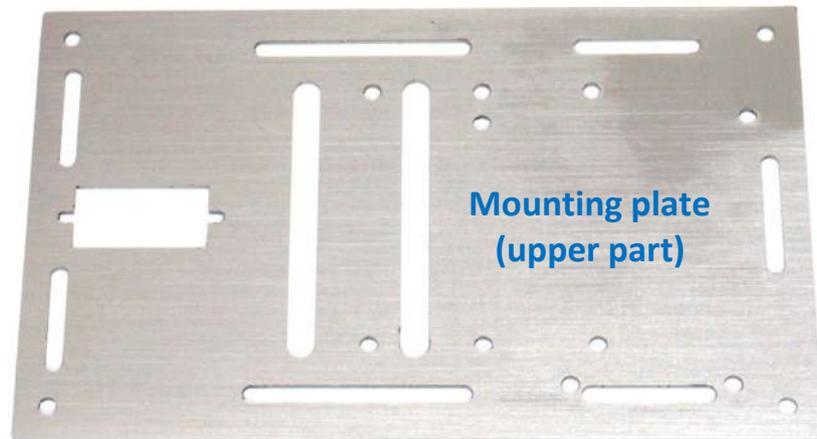

Mounting plate (lower part)

Scanning device

Mounting plate (upper part)

Battery container

Optional version of pan/tilt head (for Raspberry Pi camera and ultrasound sensor) - can be mounted together or separately on the head

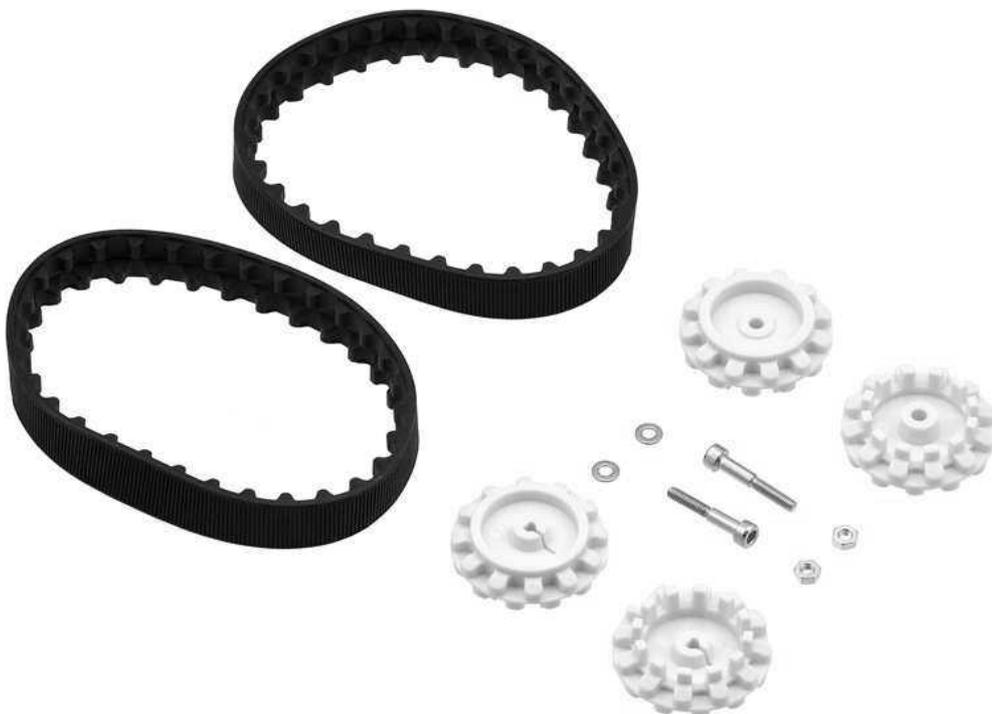

### Motors, fasteners and front wheels for 2 and 4 wheel drive system

### Rear wheels for 4-wheeled drive system

### Track set with 2 front and rear drive wheels

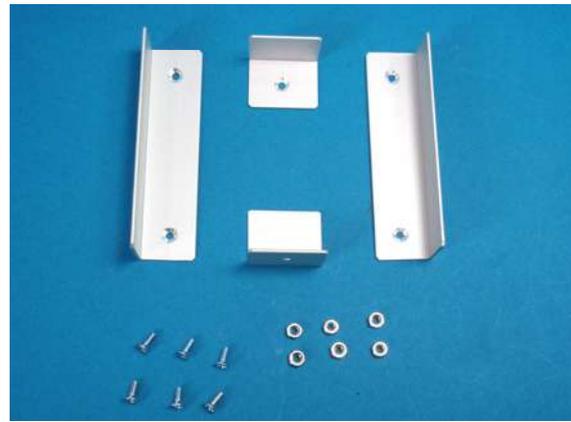

Supporting ball caster (½") (for 2-wheeled version)

Metal standoffs

Fixing set for the battery container

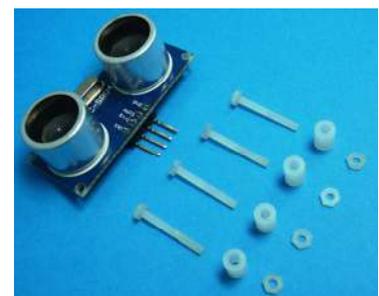

Line sensors

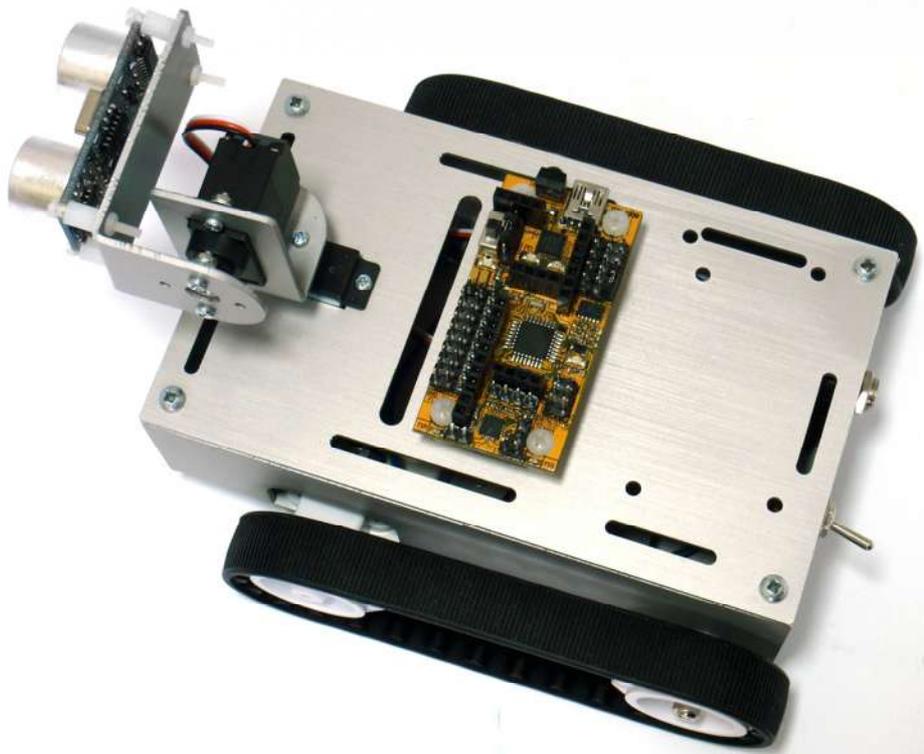

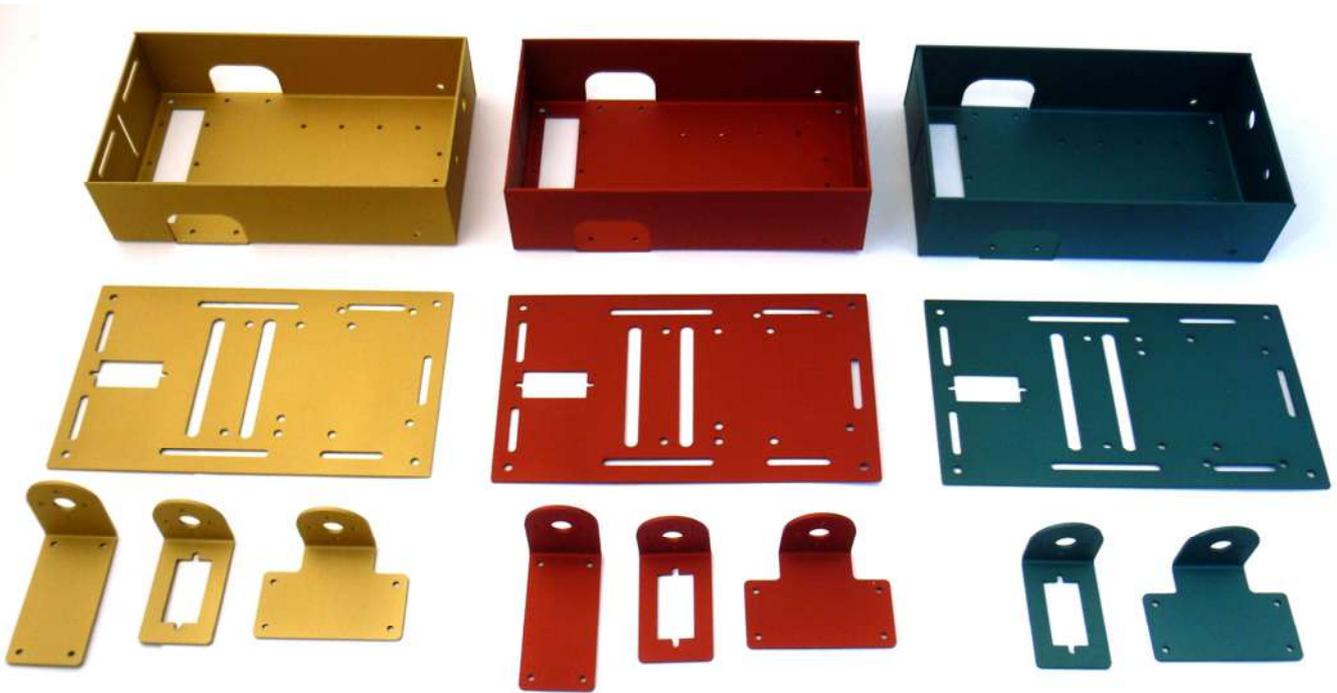

Scanner with one servo

Ultrasonic sensor module and sensor fixing set

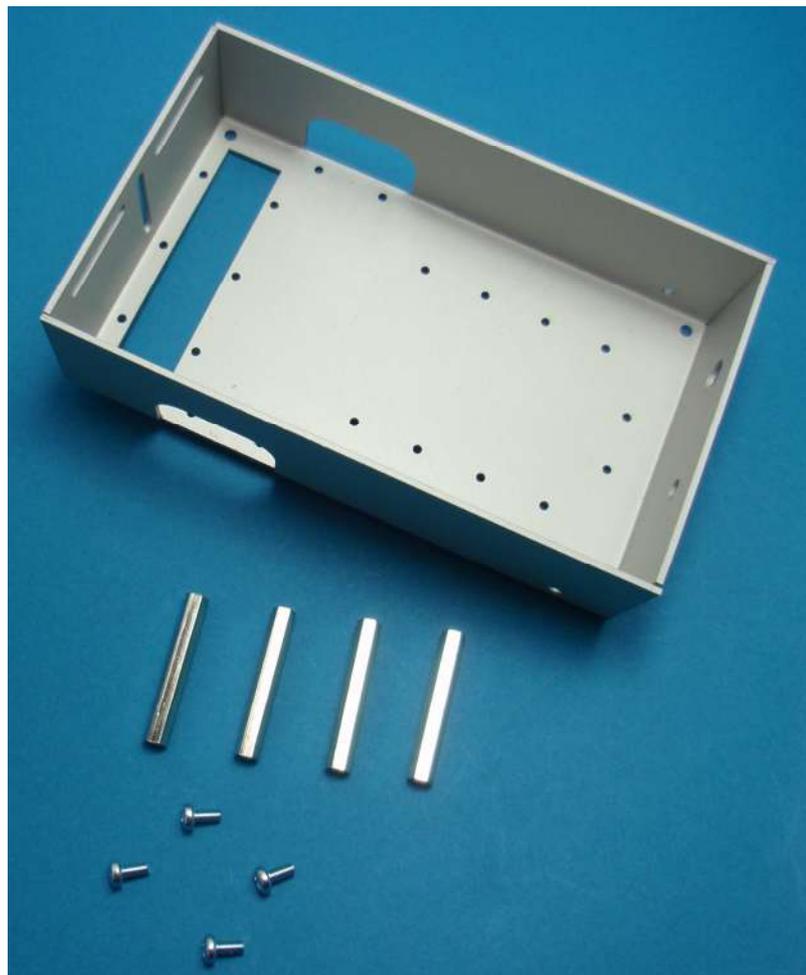

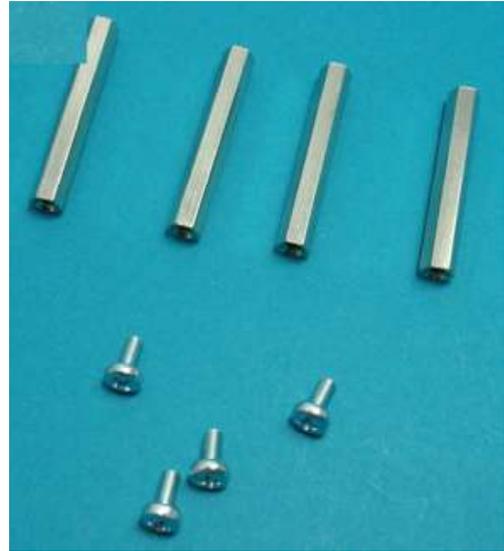

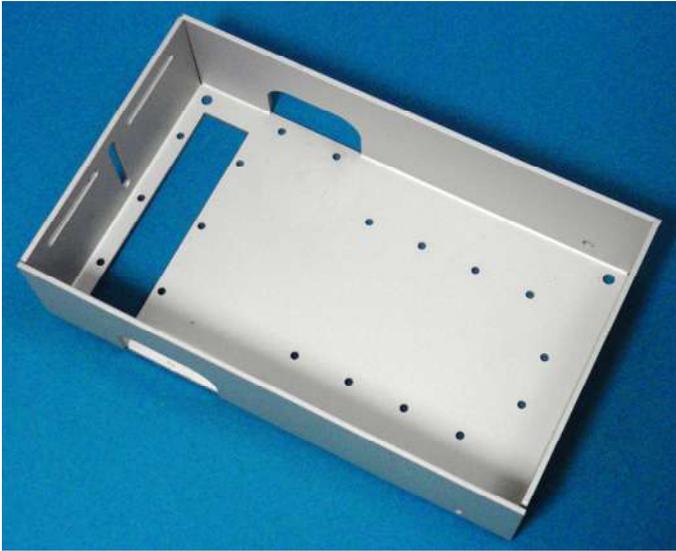

The platform is available in different colors

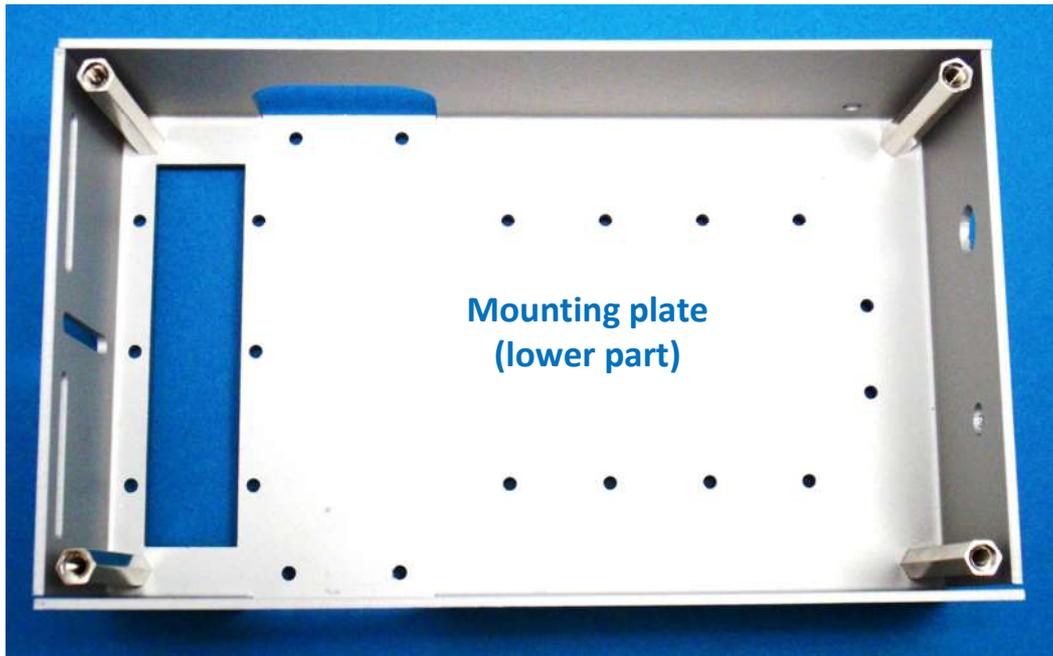

# STEP 1

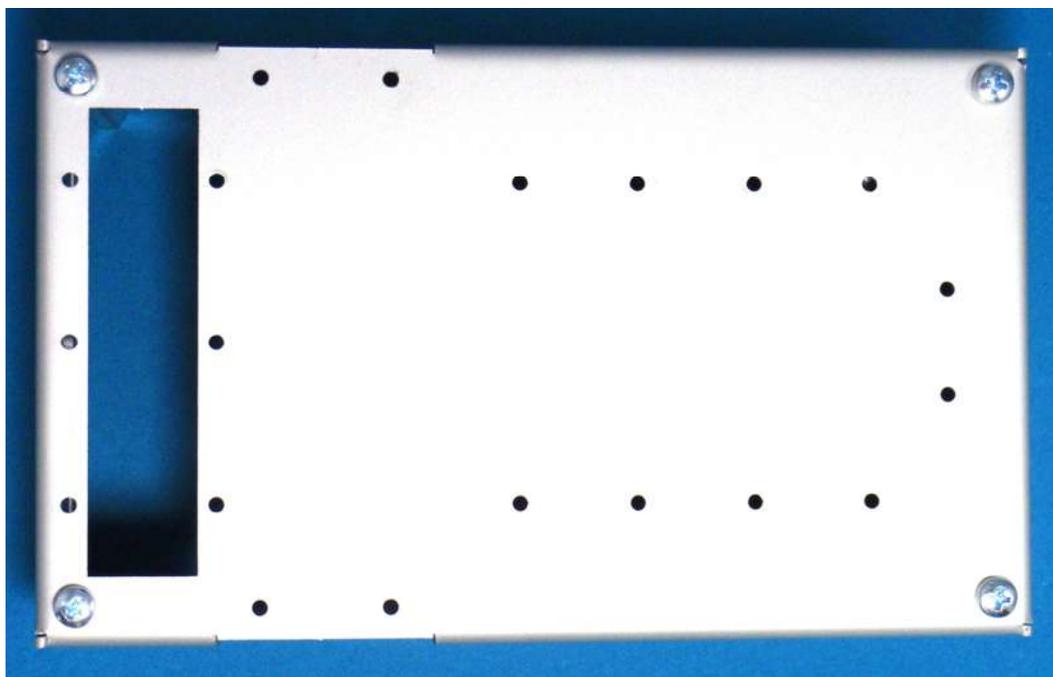

## Metal standoffs

### Mounting plate (lower part) with 4 standoffs

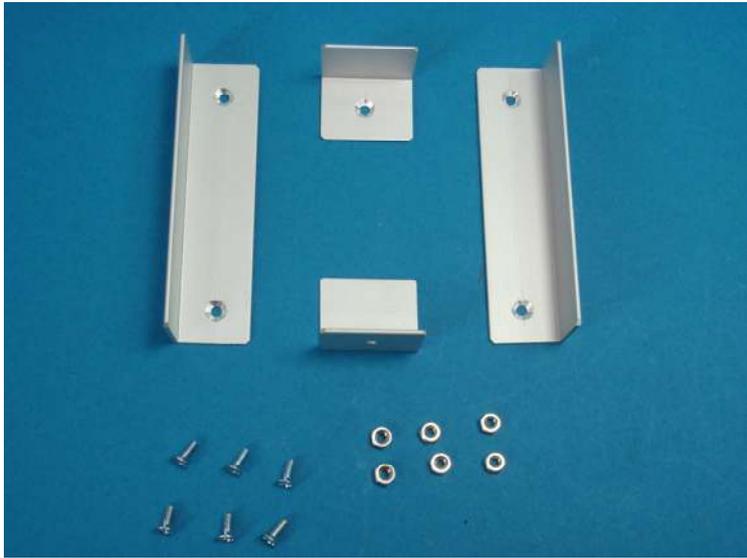

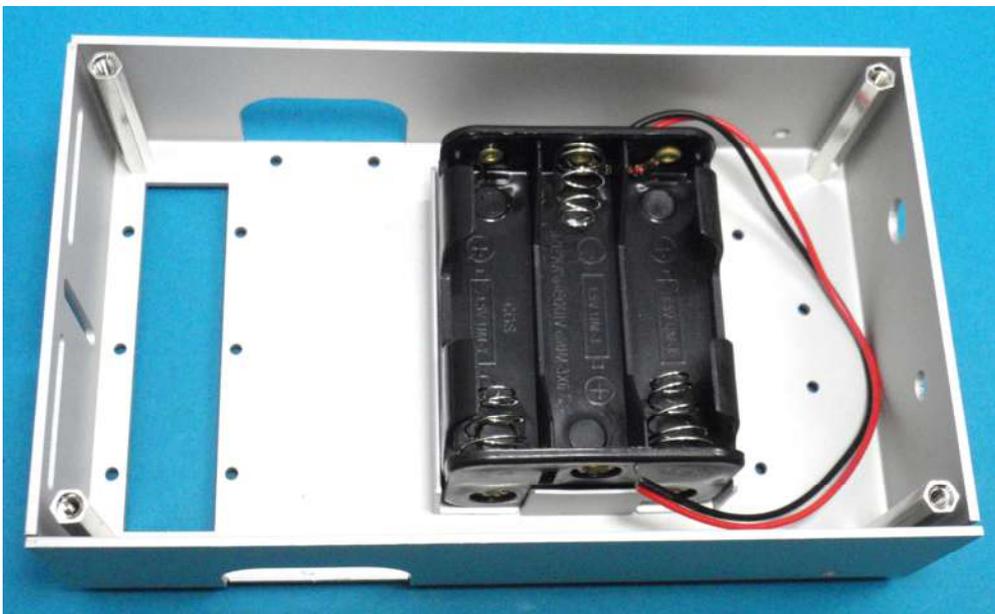

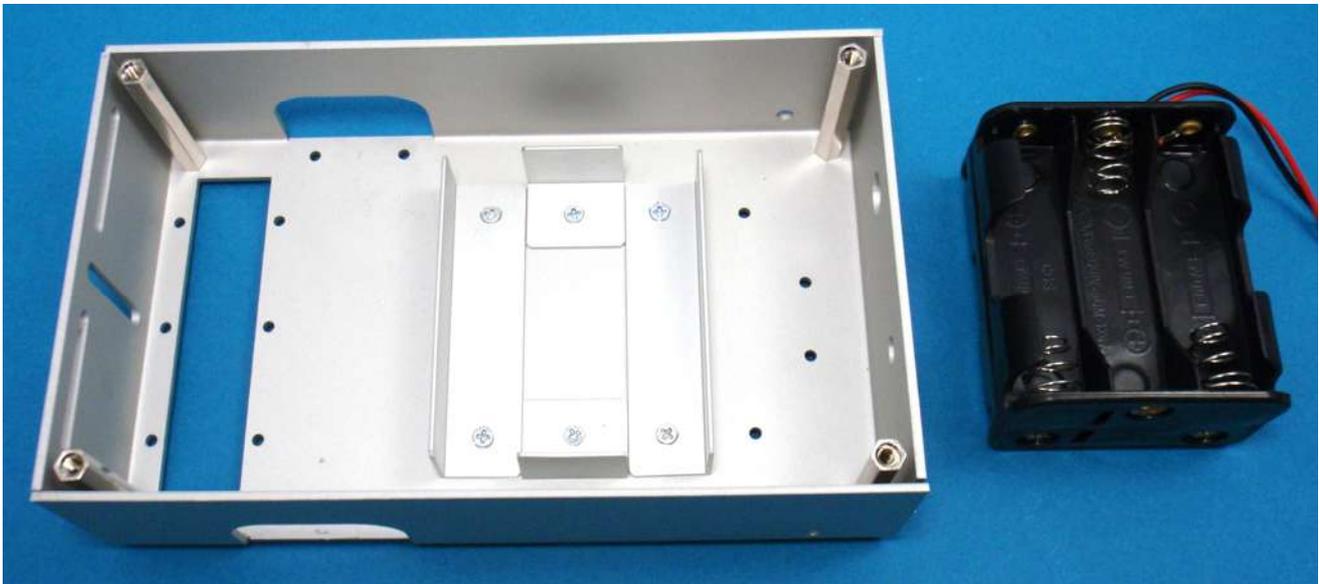

### Mounting plate (lower part) – view from bottom

## STEP 2

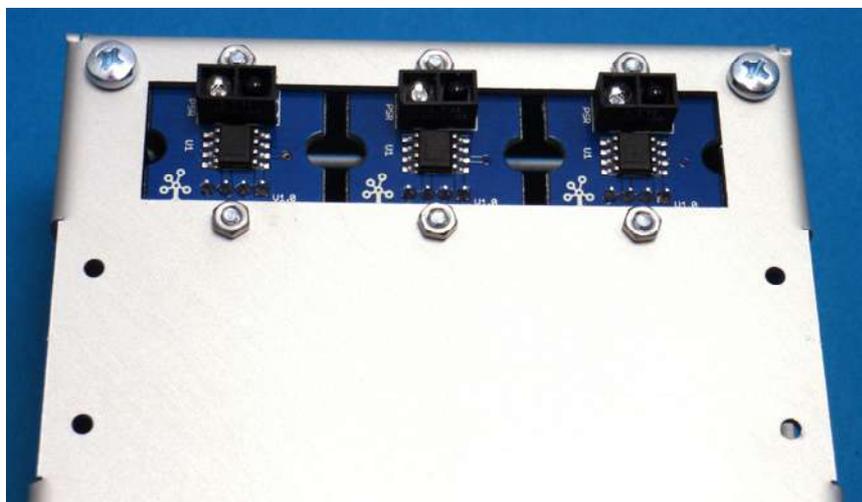

### Fixing set for the battery container

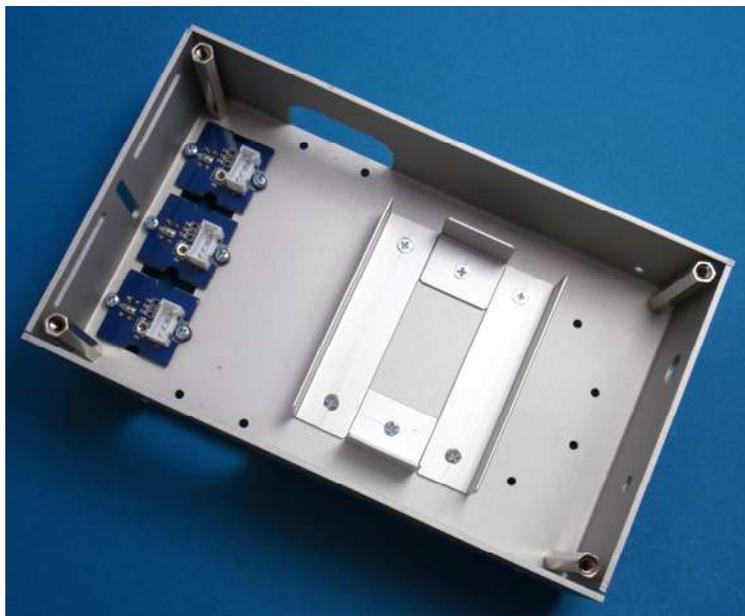

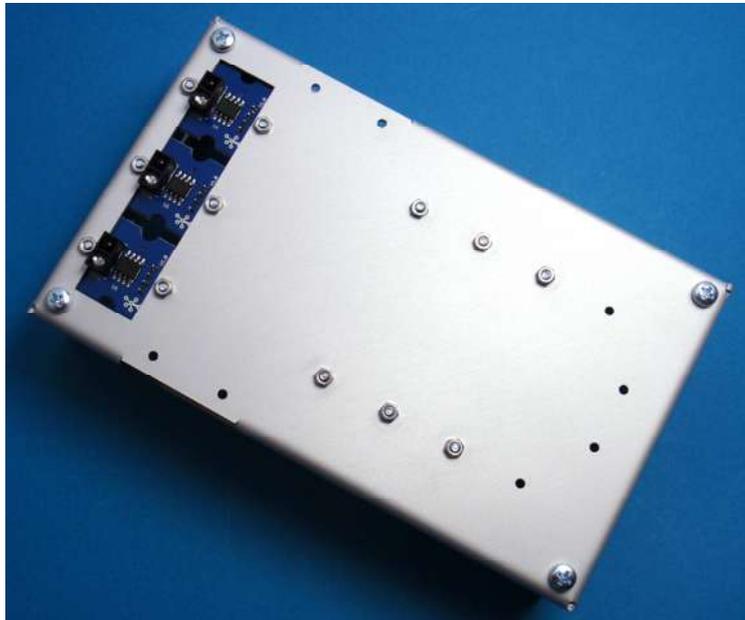

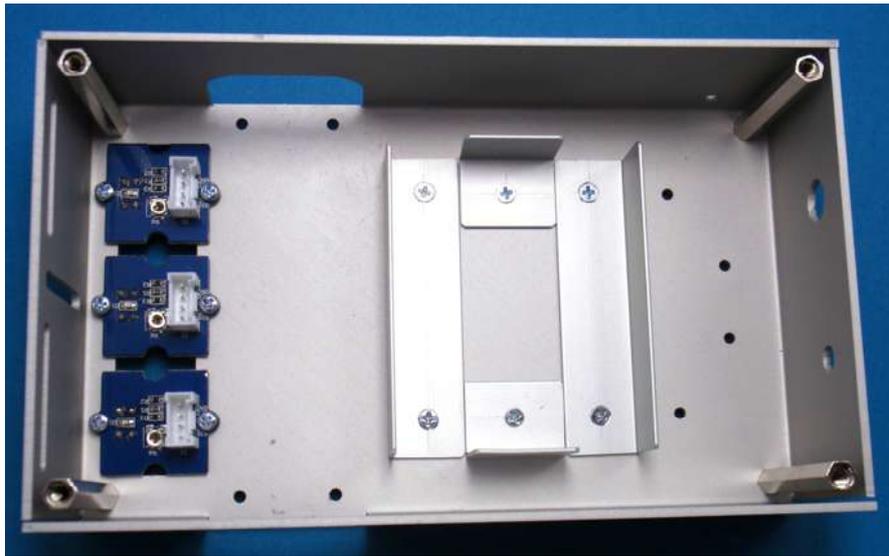

## STEP 3

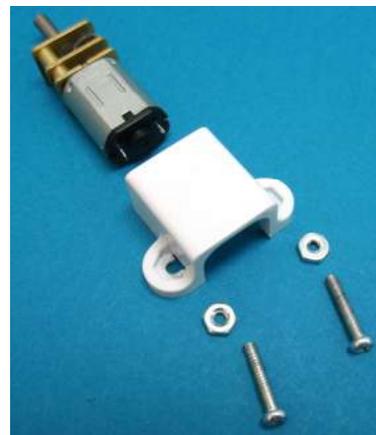

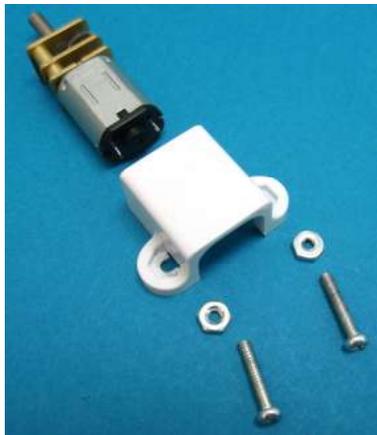

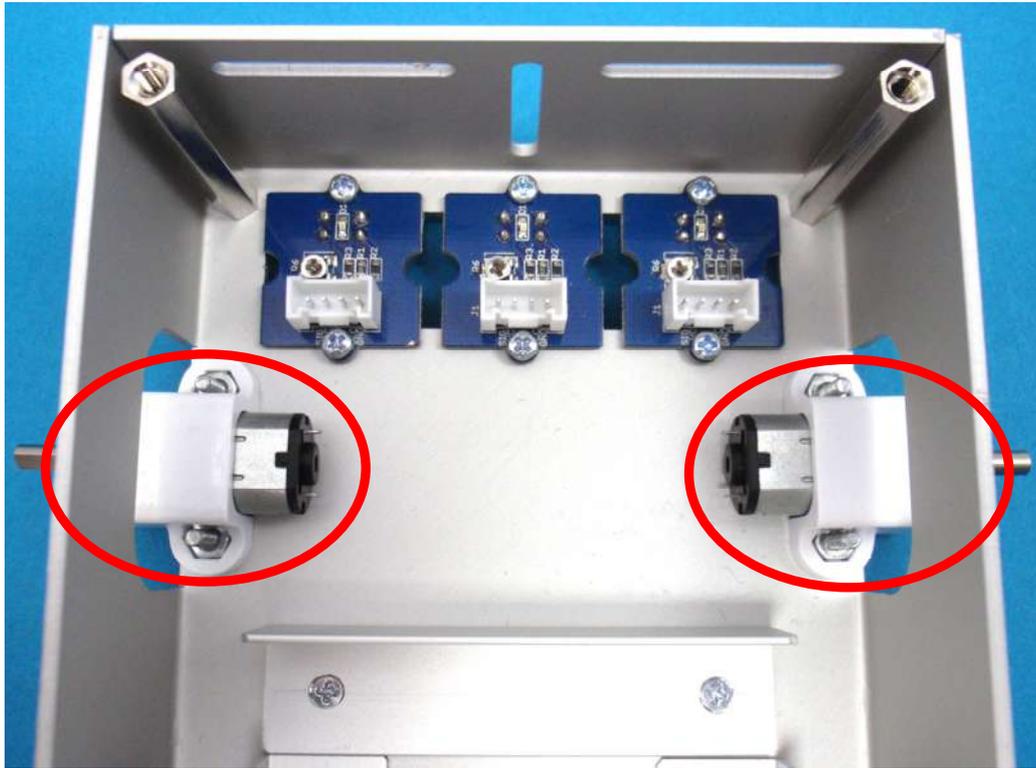

### Line sensors

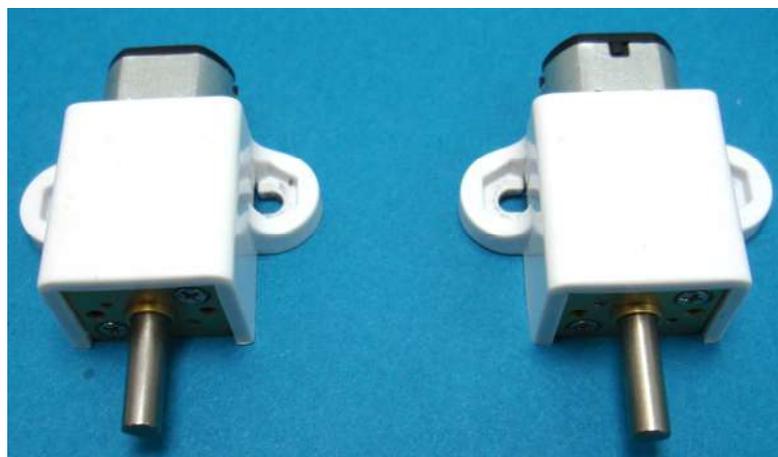

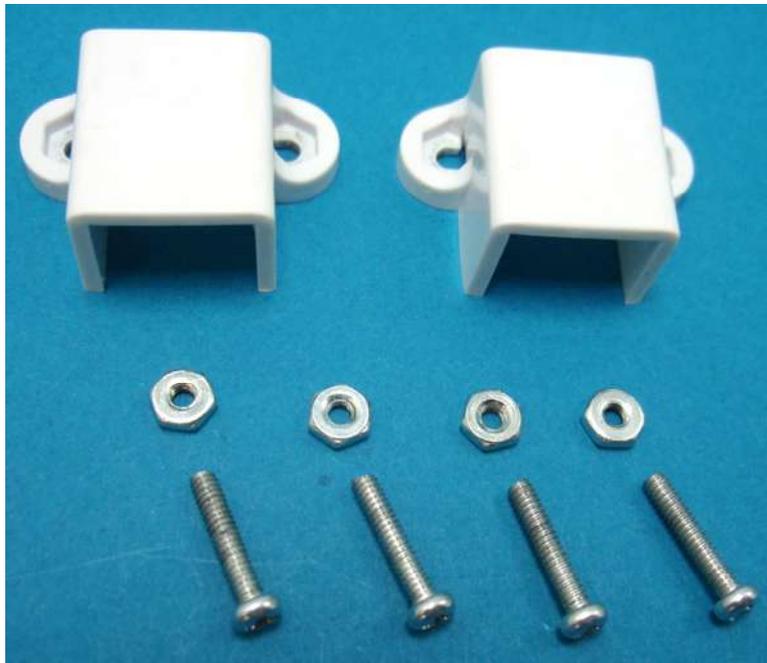

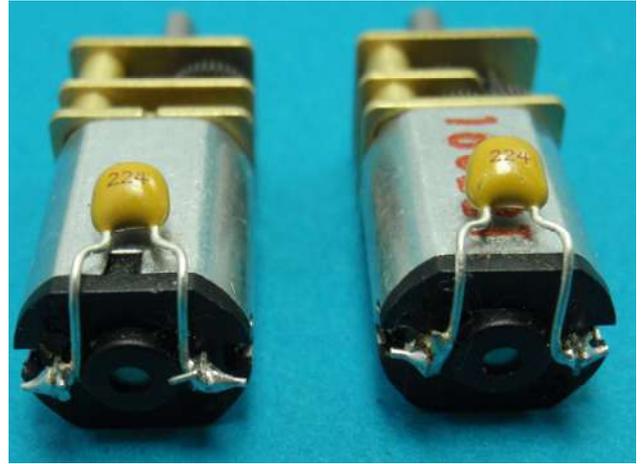

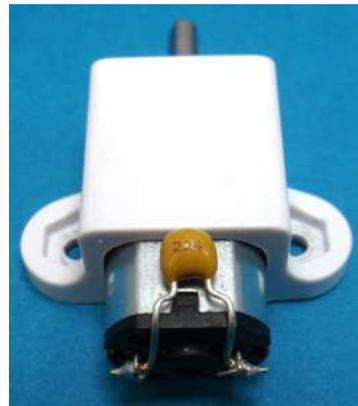

## STEP 4

### Motors and fasteners

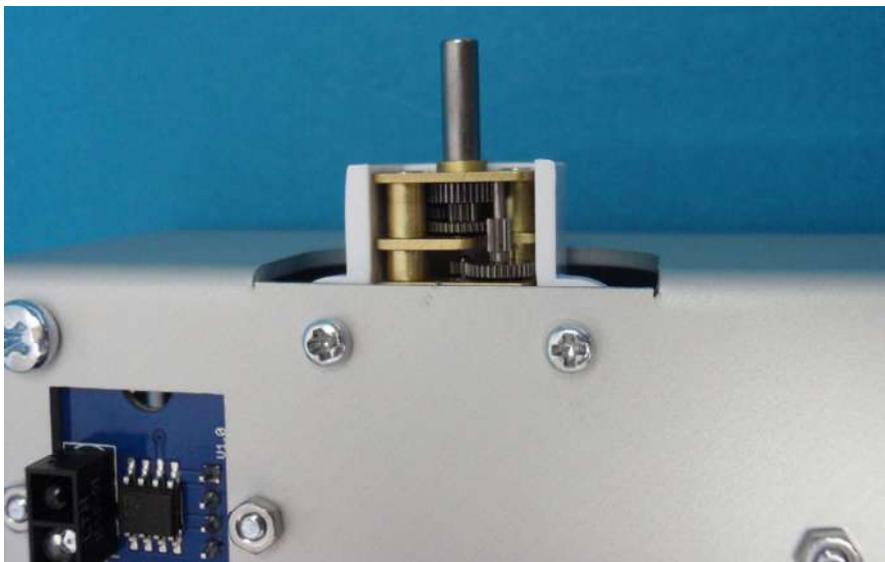

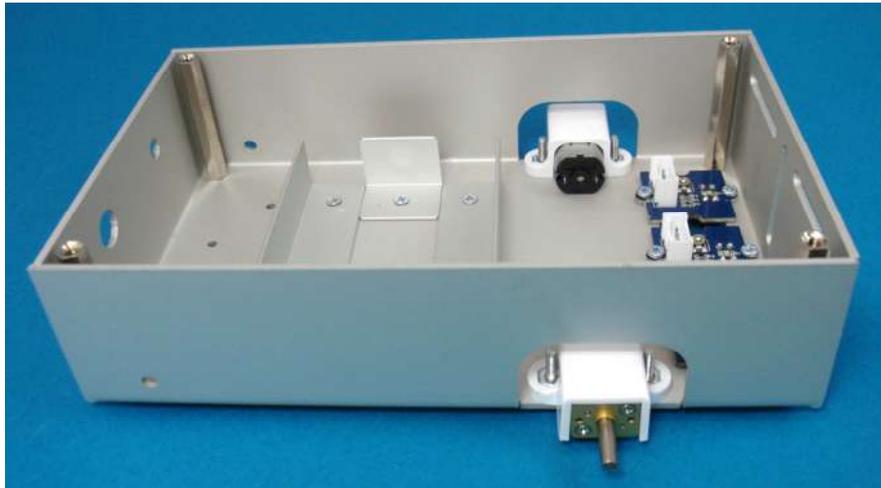

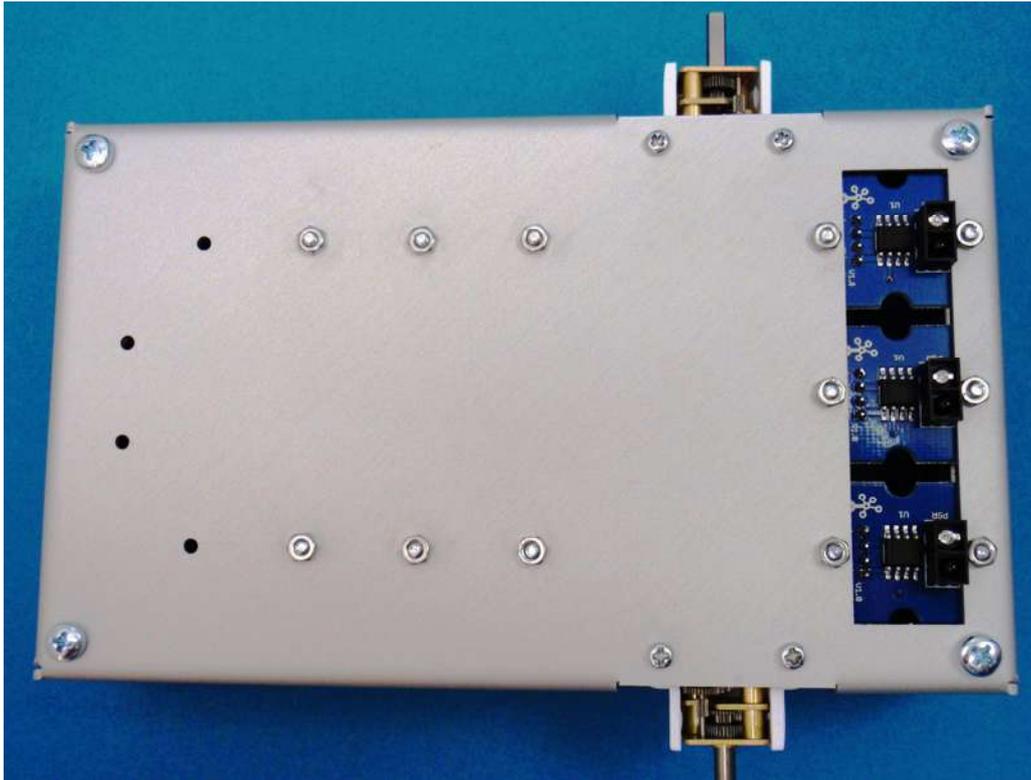

### The assembly principle of motor to lower mounting plate

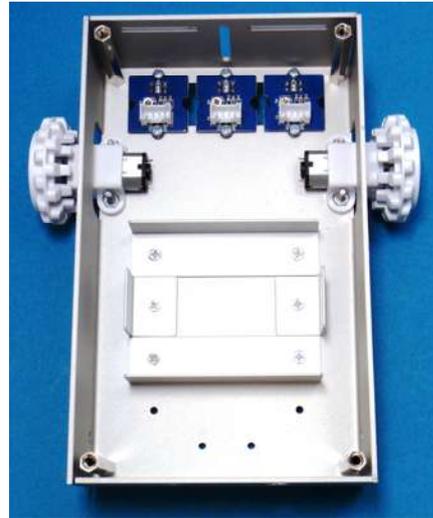

## STEP 5

### Drive system (version 3)

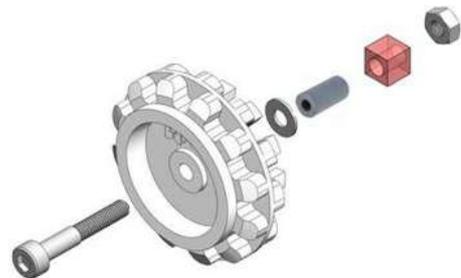

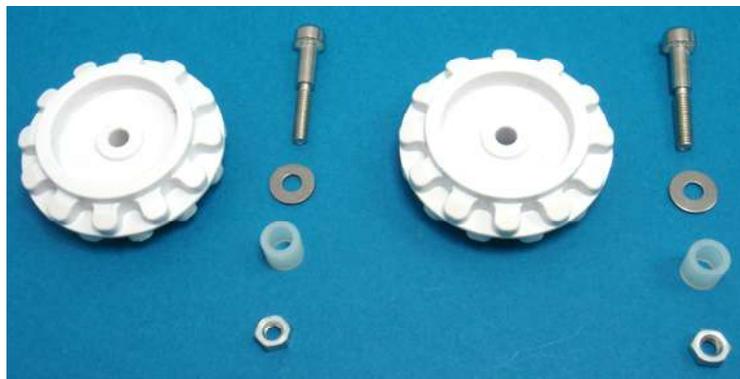

#### Version 3

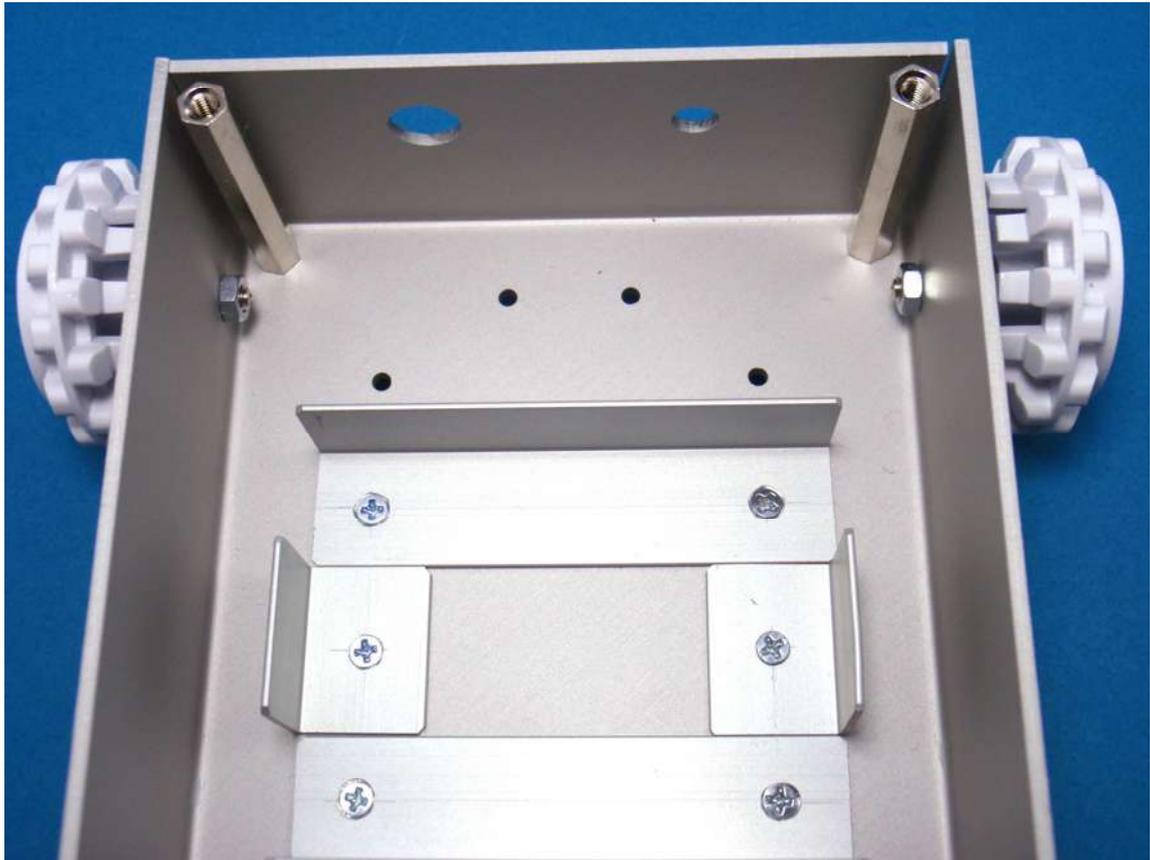

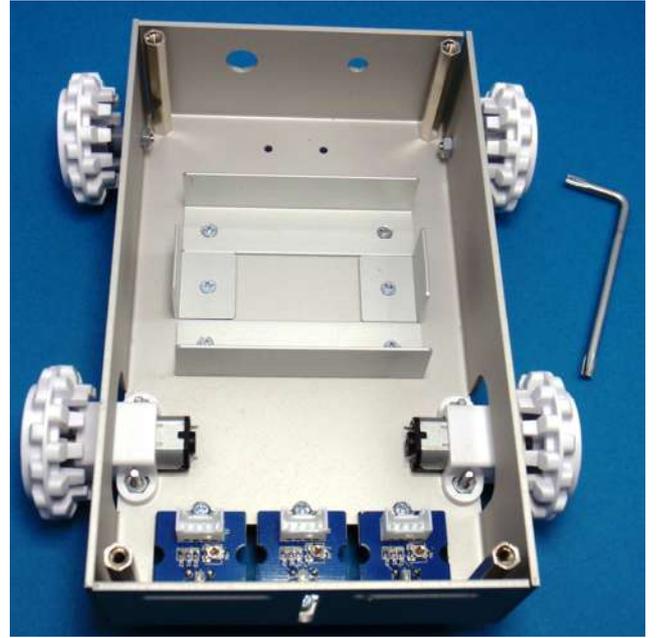

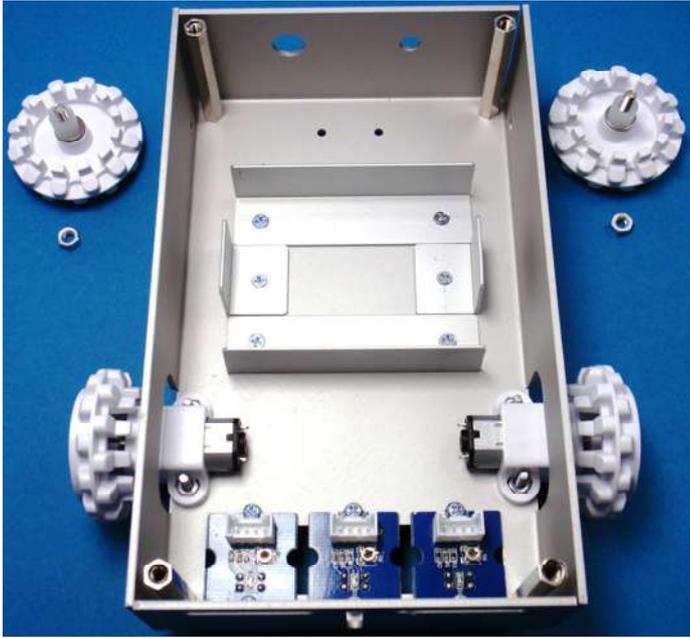

Platform with tracked drive system (two silicone tracks and two motors)

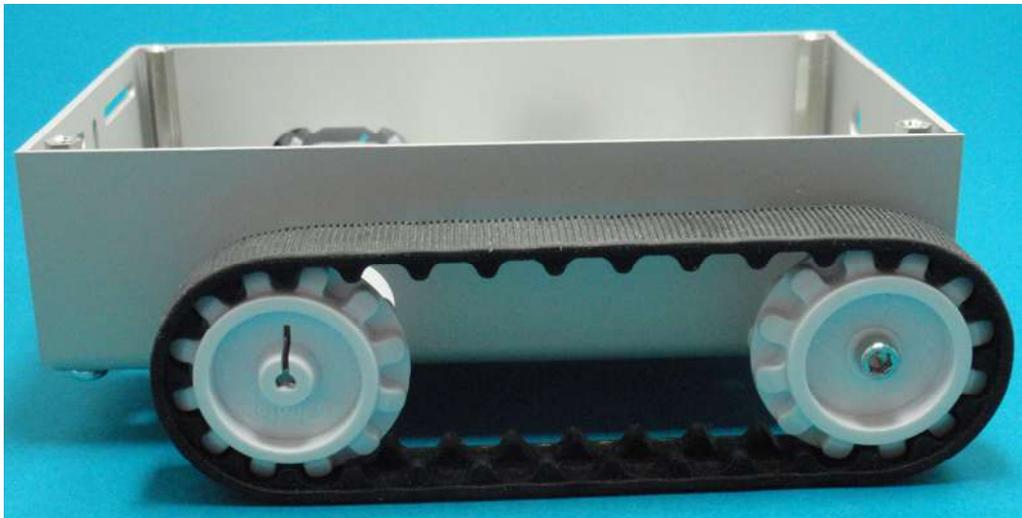

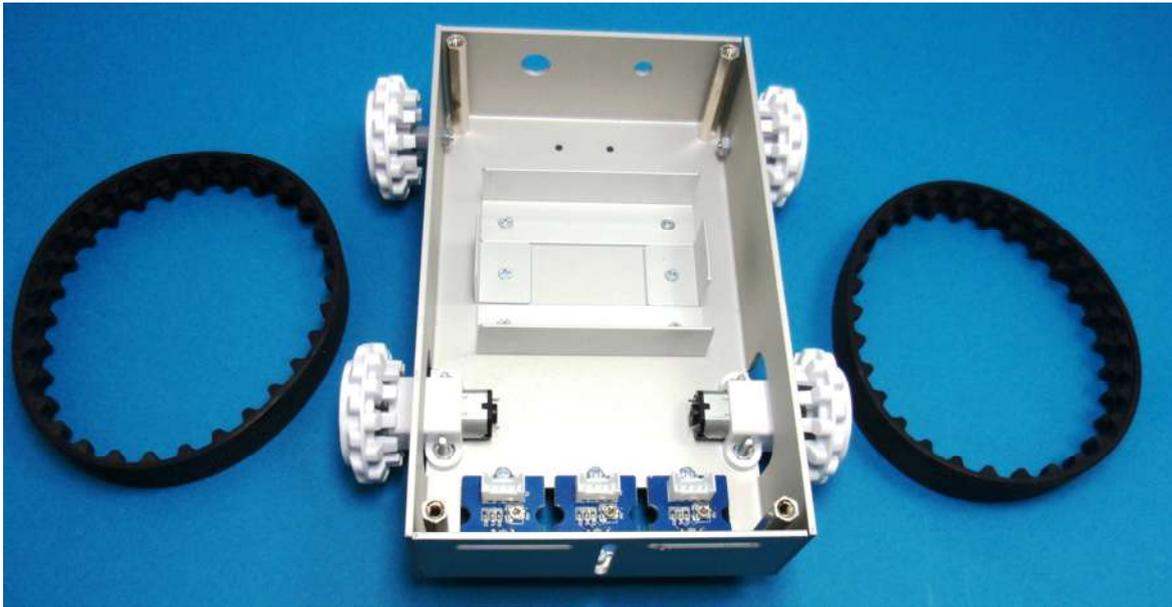

2 active front wheels

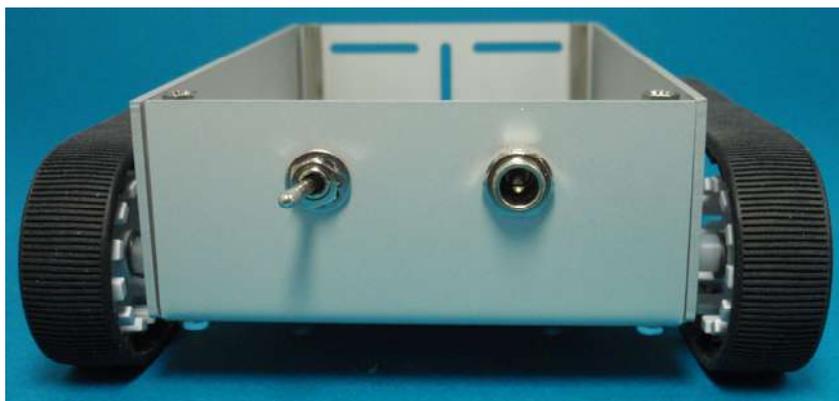

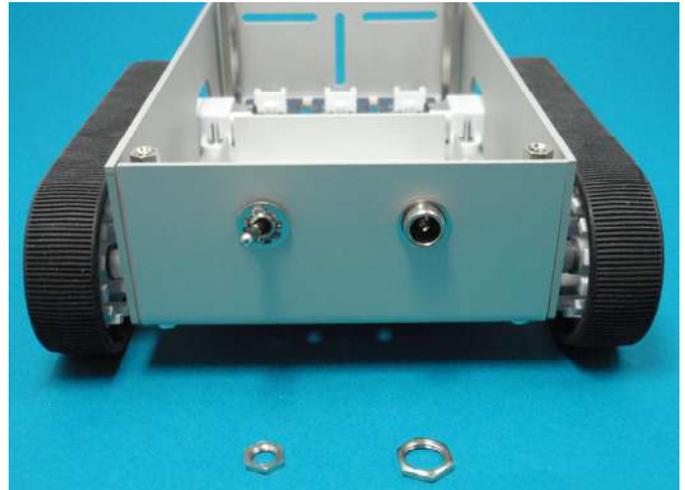

2 passive rear wheels

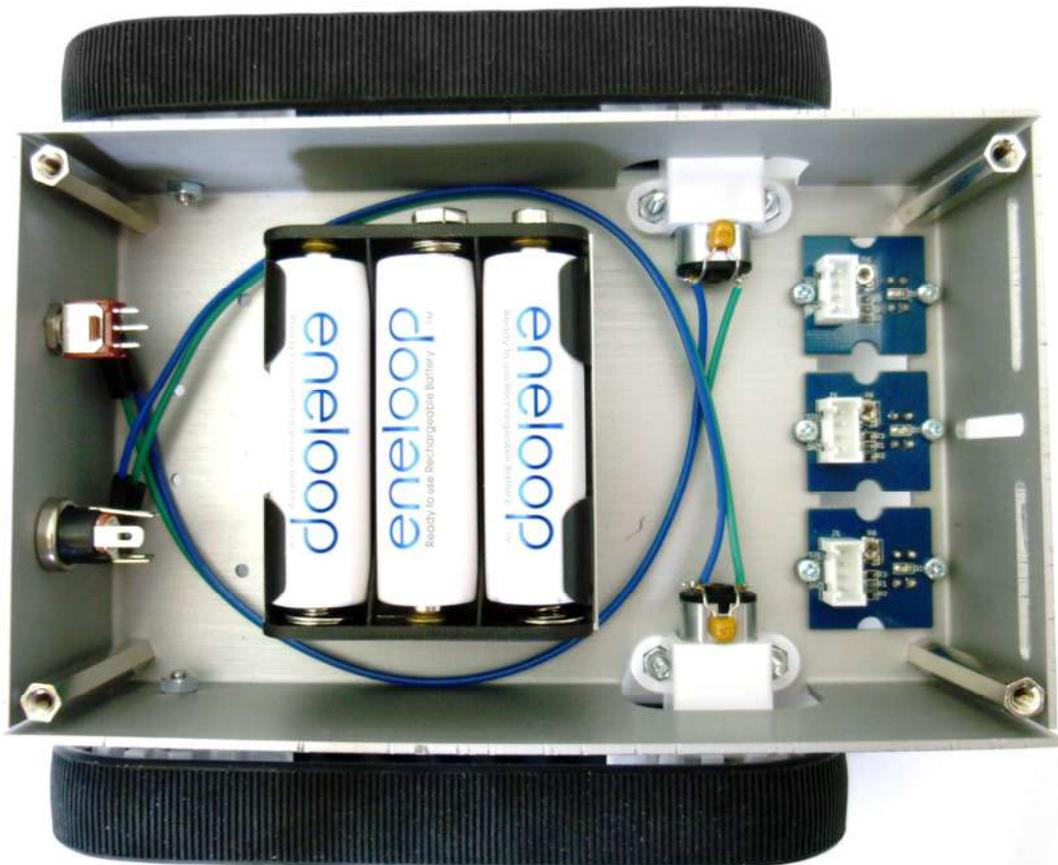

## STEP 6 (switch and power connector – for all versions of drive system)

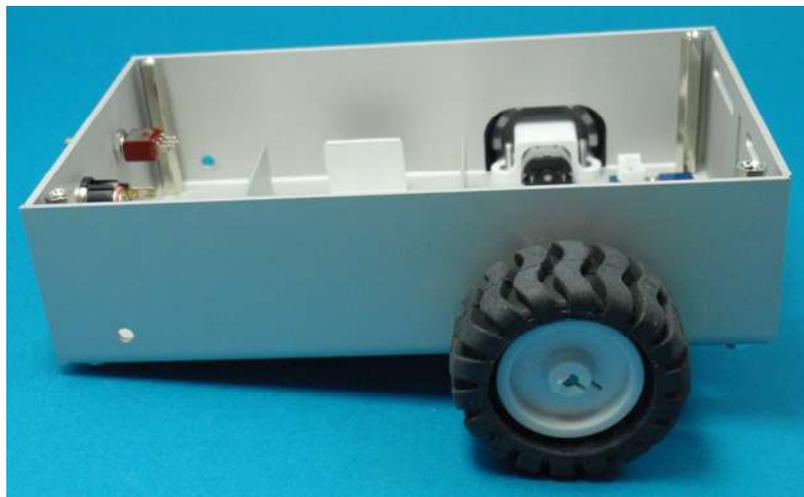

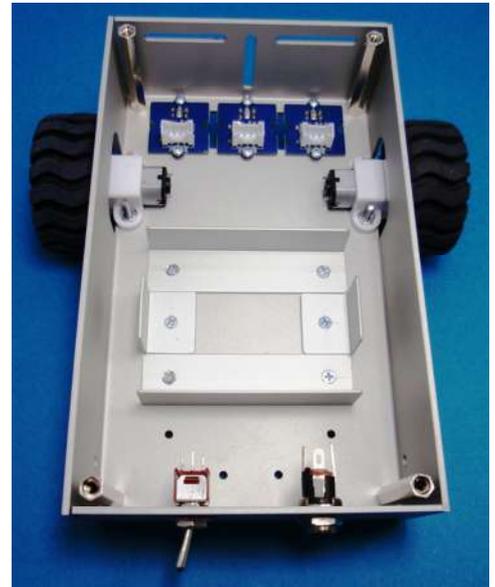

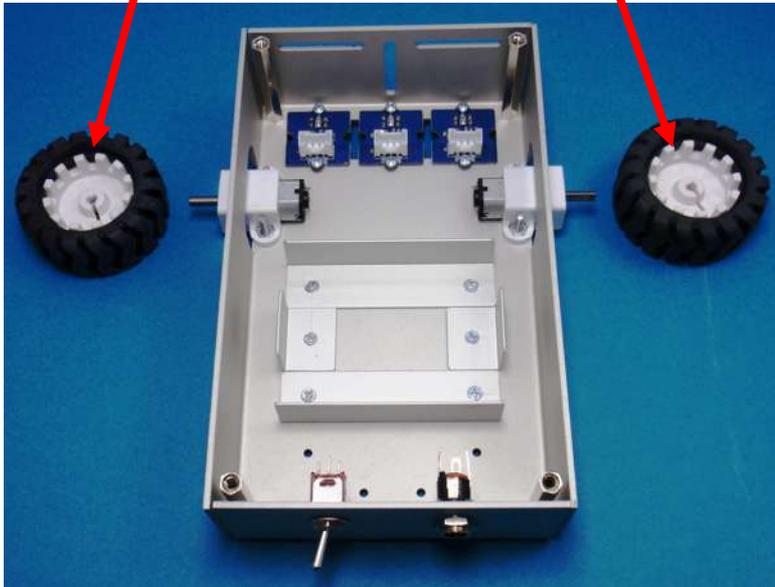

## STEP 7 (Drive system, version 1)

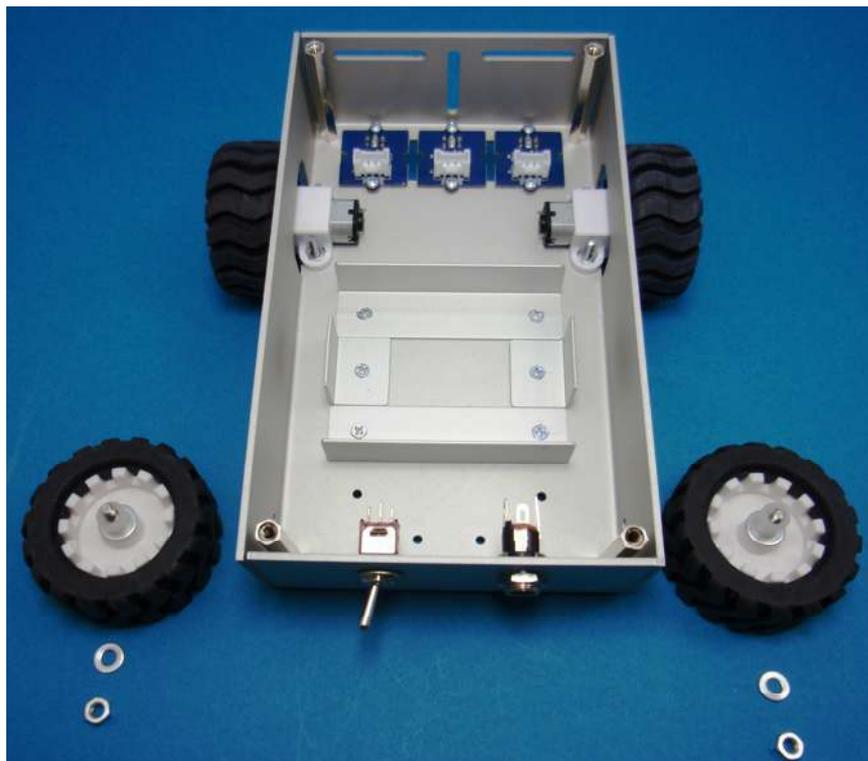

### Version 1

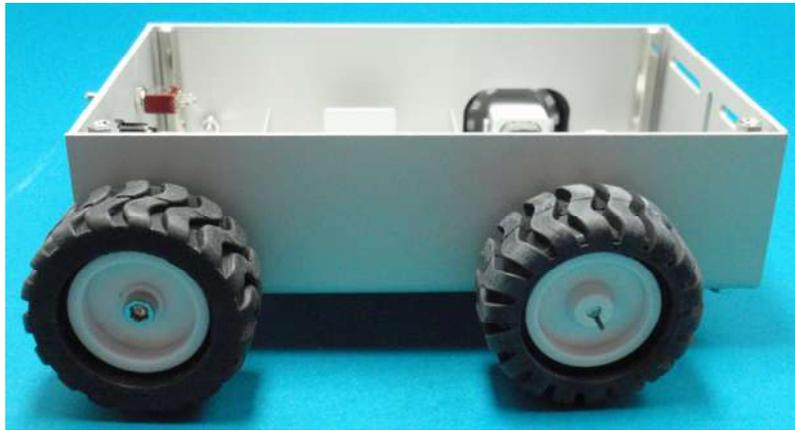

Four-wheeled platform (2 active front wheels and 2 passive rear wheels)

2 active front wheels (side 1 and side 2)

2 passive rear wheels (side 1 and side 2)

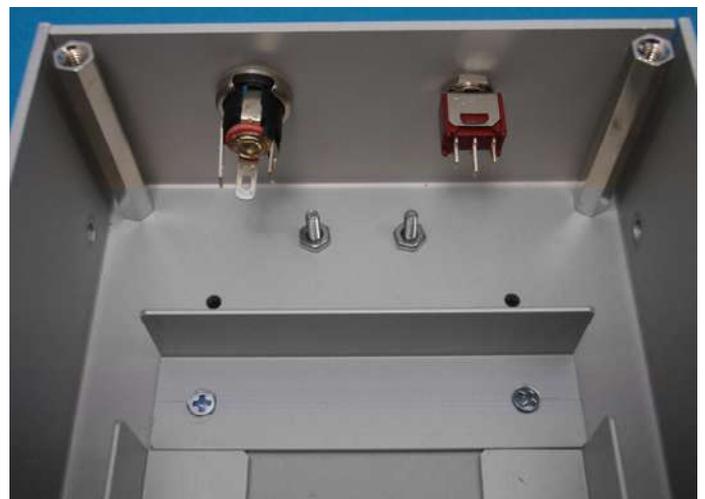

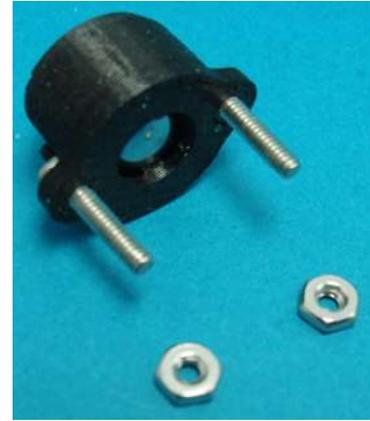

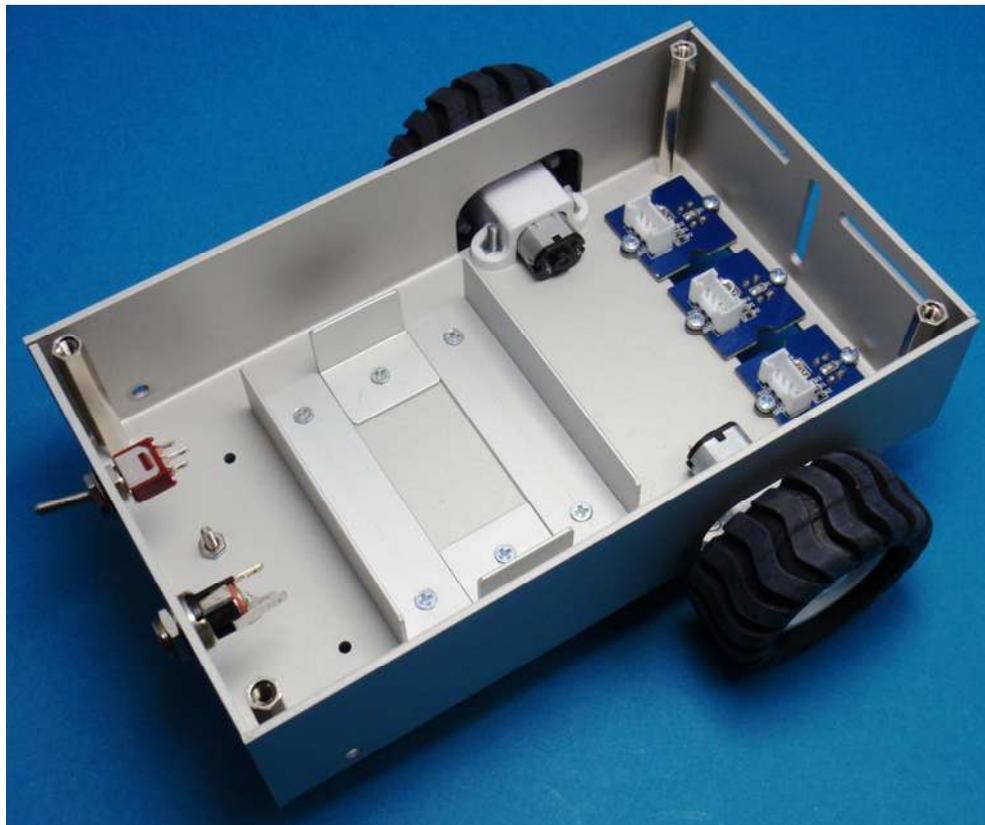

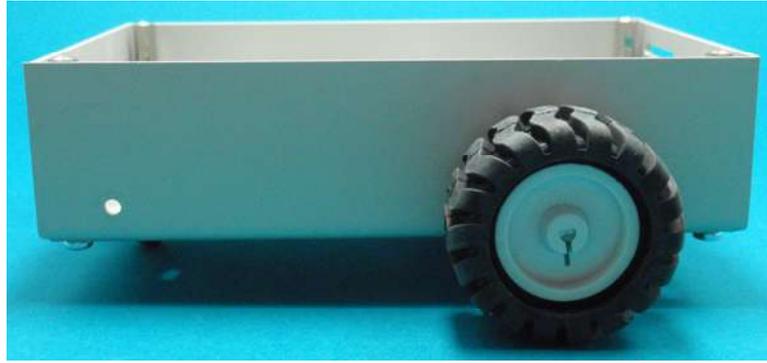

## STEP 8 (Drive system, version 2)

### Version 2

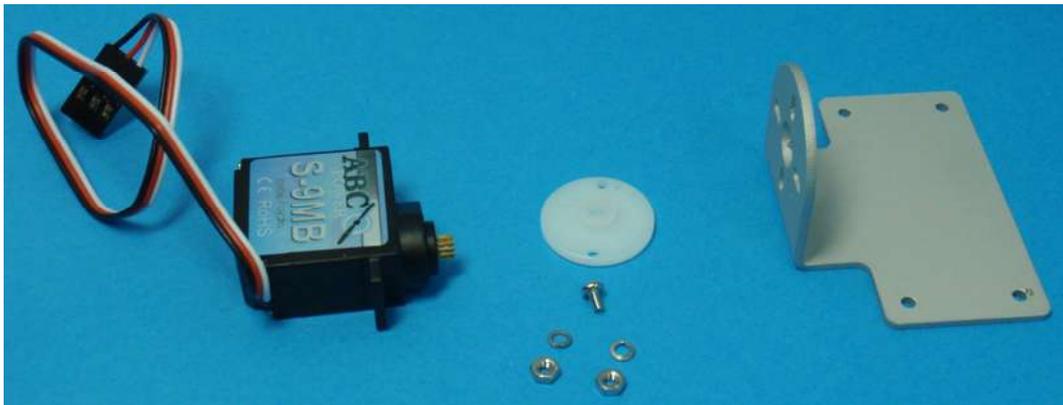

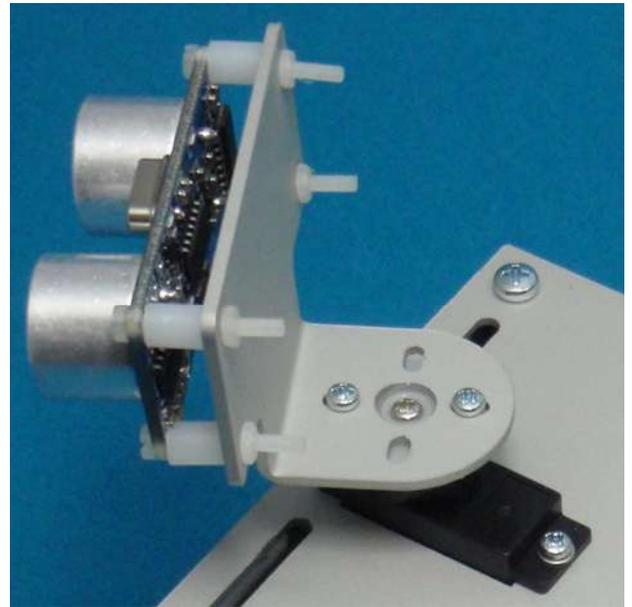

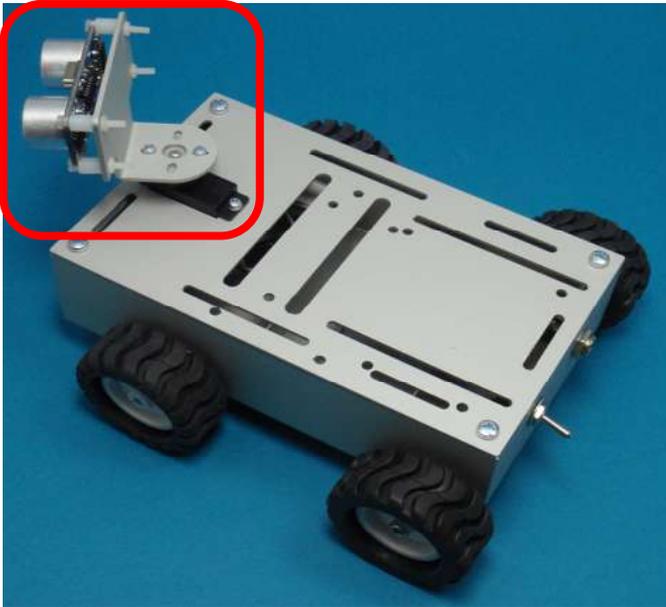

Two-wheeled platform with supporting ball caster and two motors

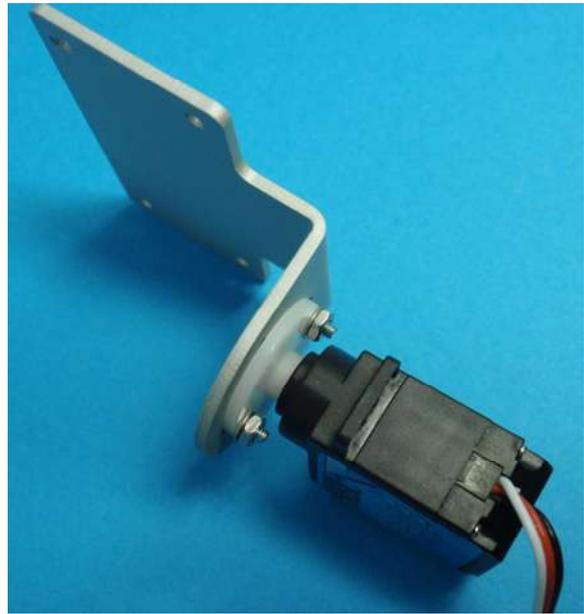

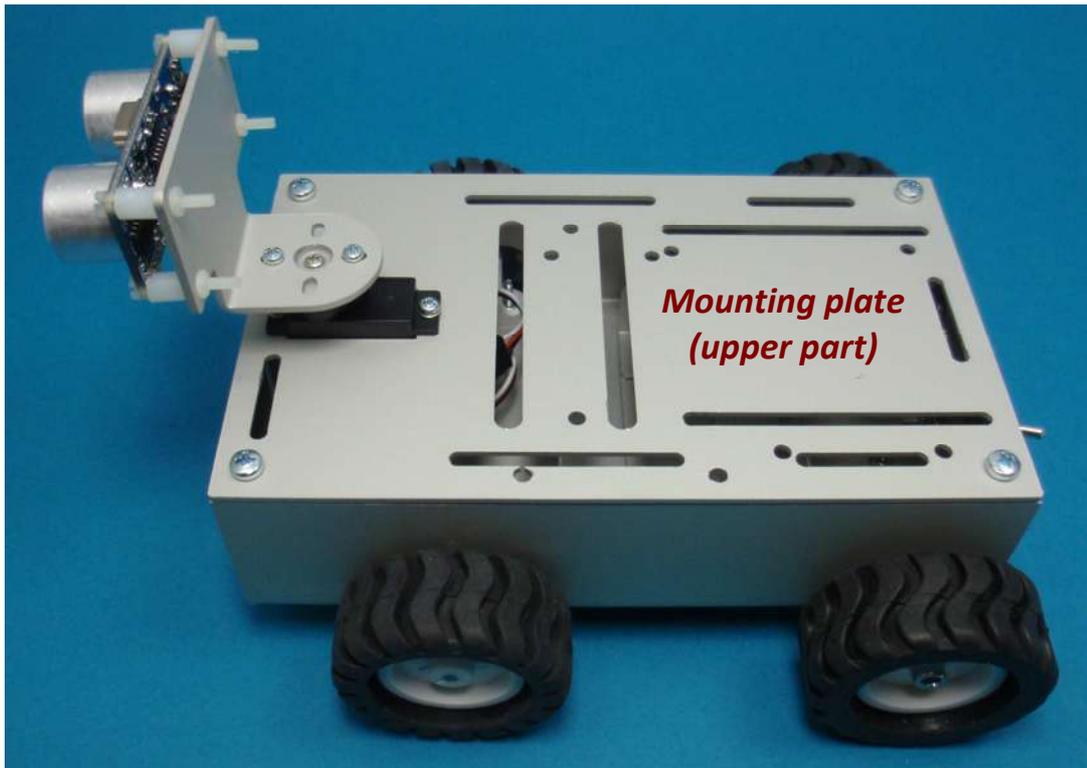

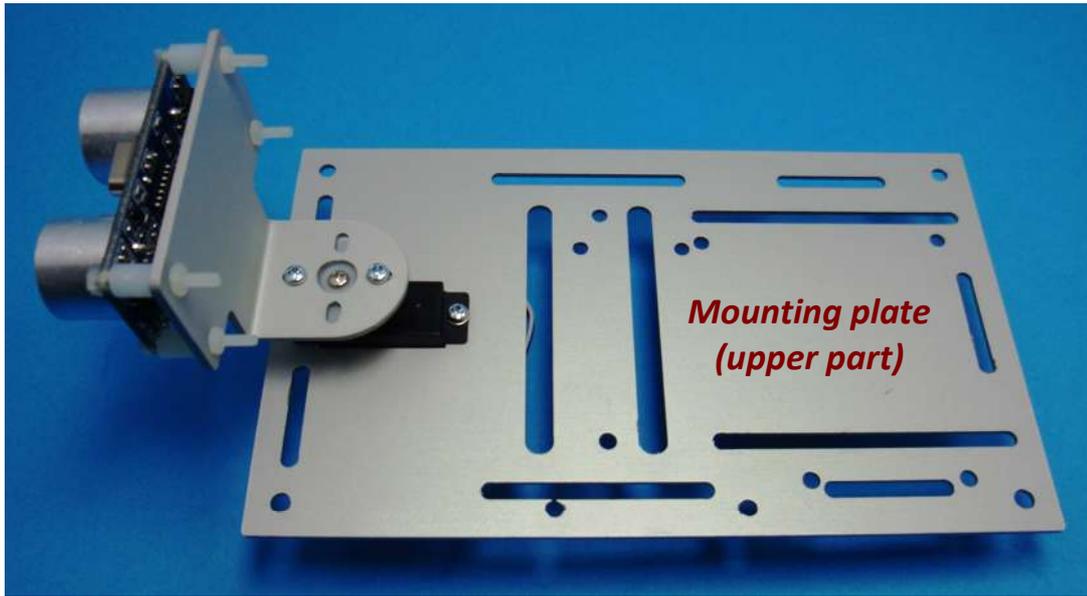

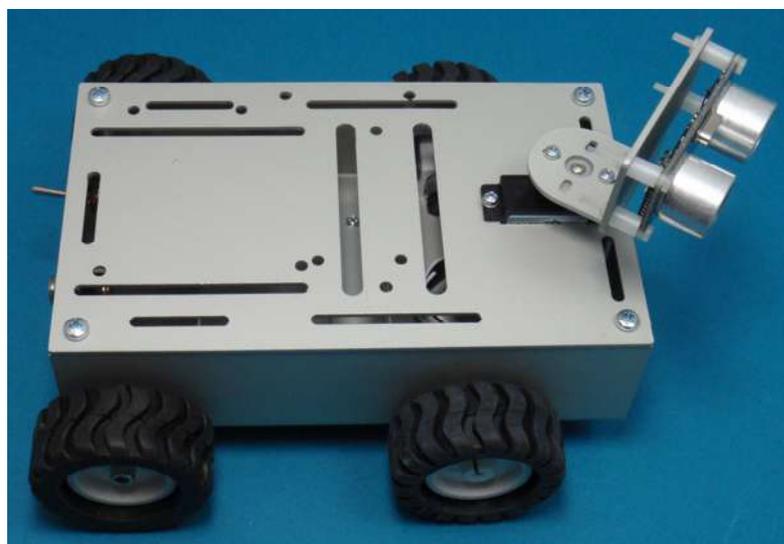

## STEP 9

### Sensor Pan/Tilt Kit (with one servo)

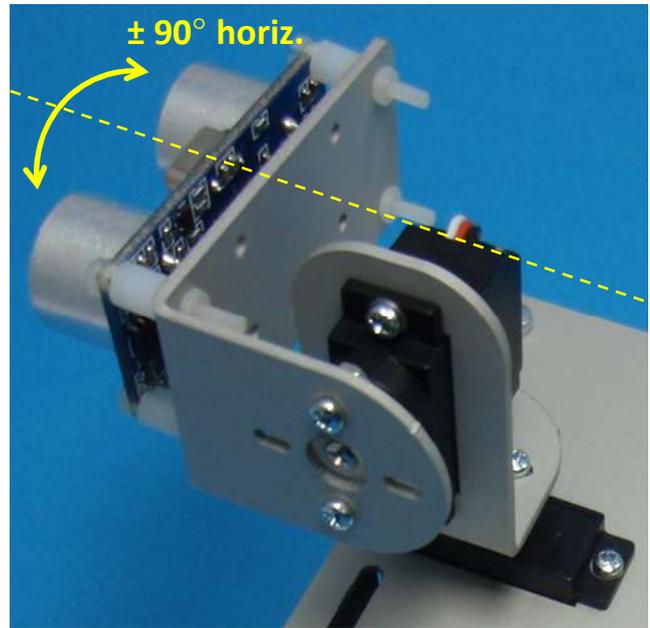

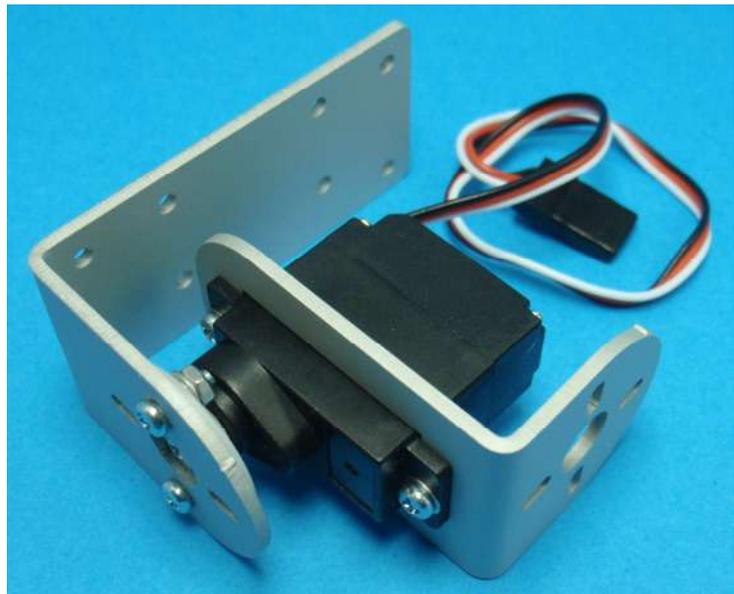

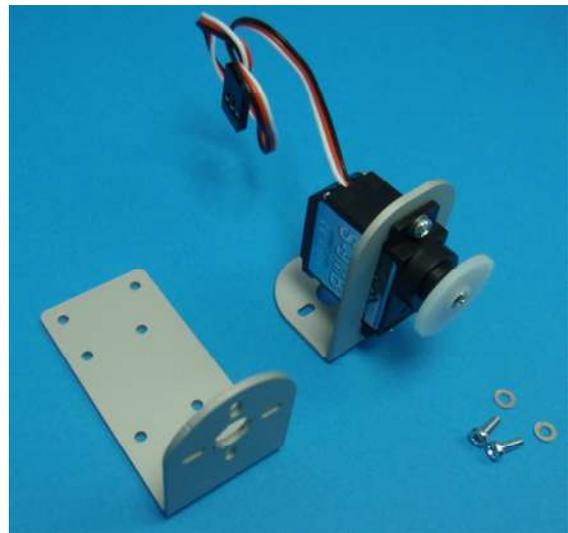

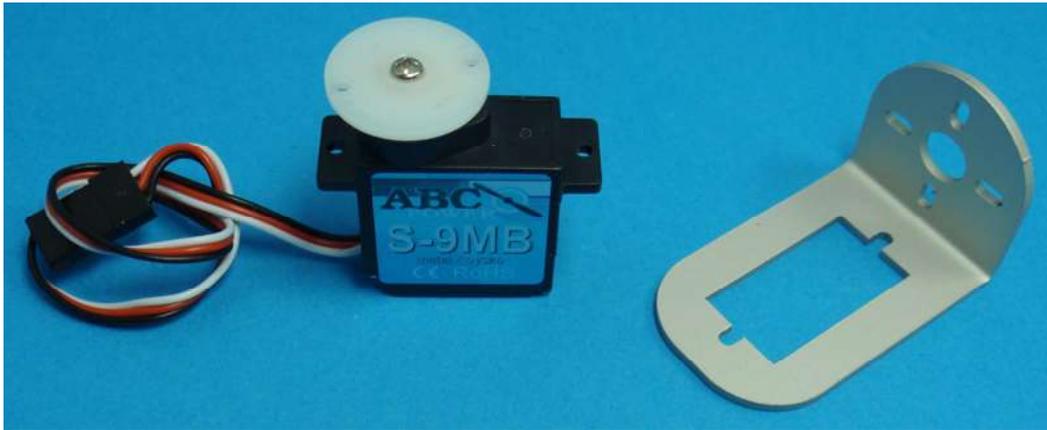

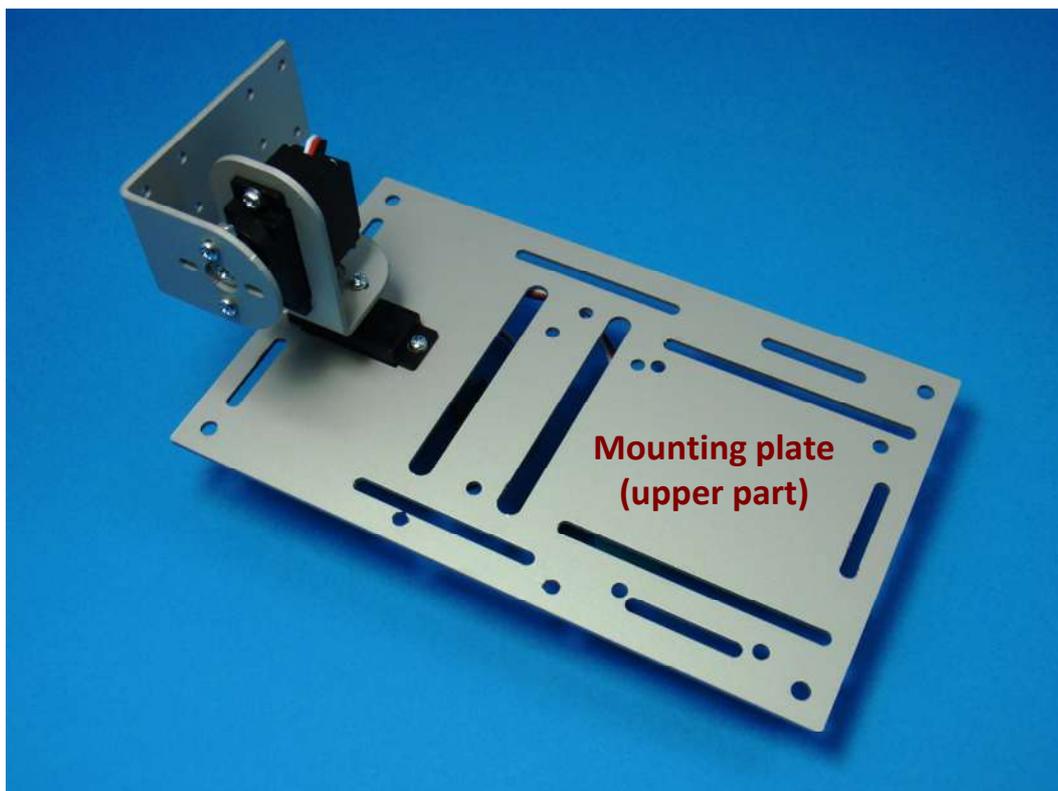

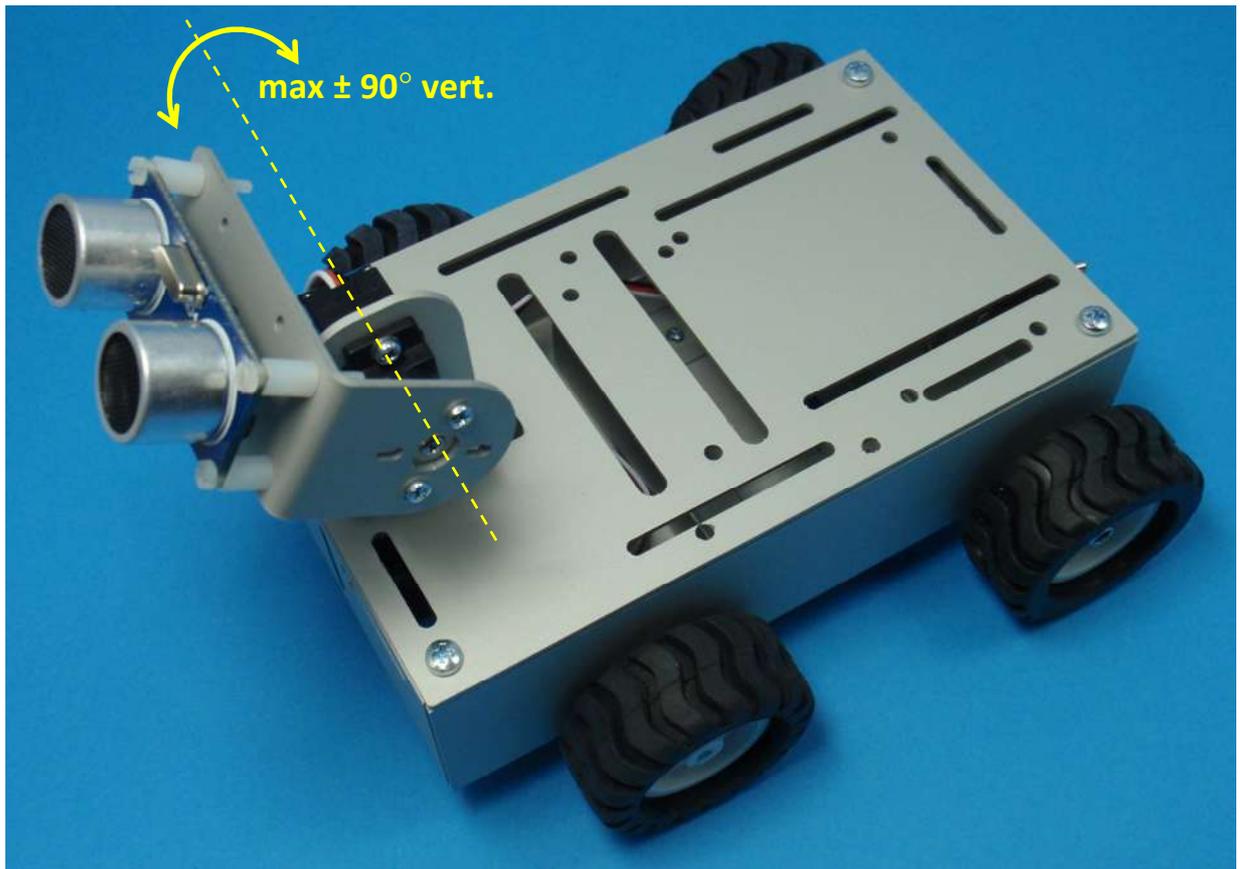

## STEP 10

### Sensor Pan/Tilt Kit (with two servos)

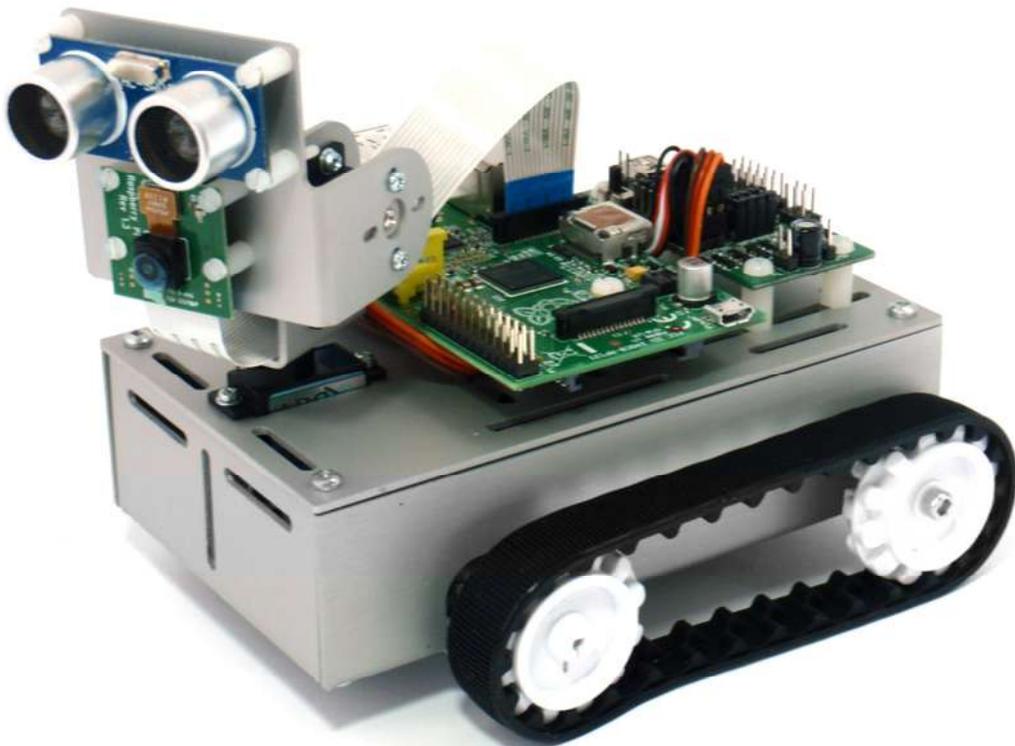

Optional version of pan/tilt head (for Raspberry Pi camera and ultrasonic distance sensor) - can be mounted together or separately on the head

# AMRobot

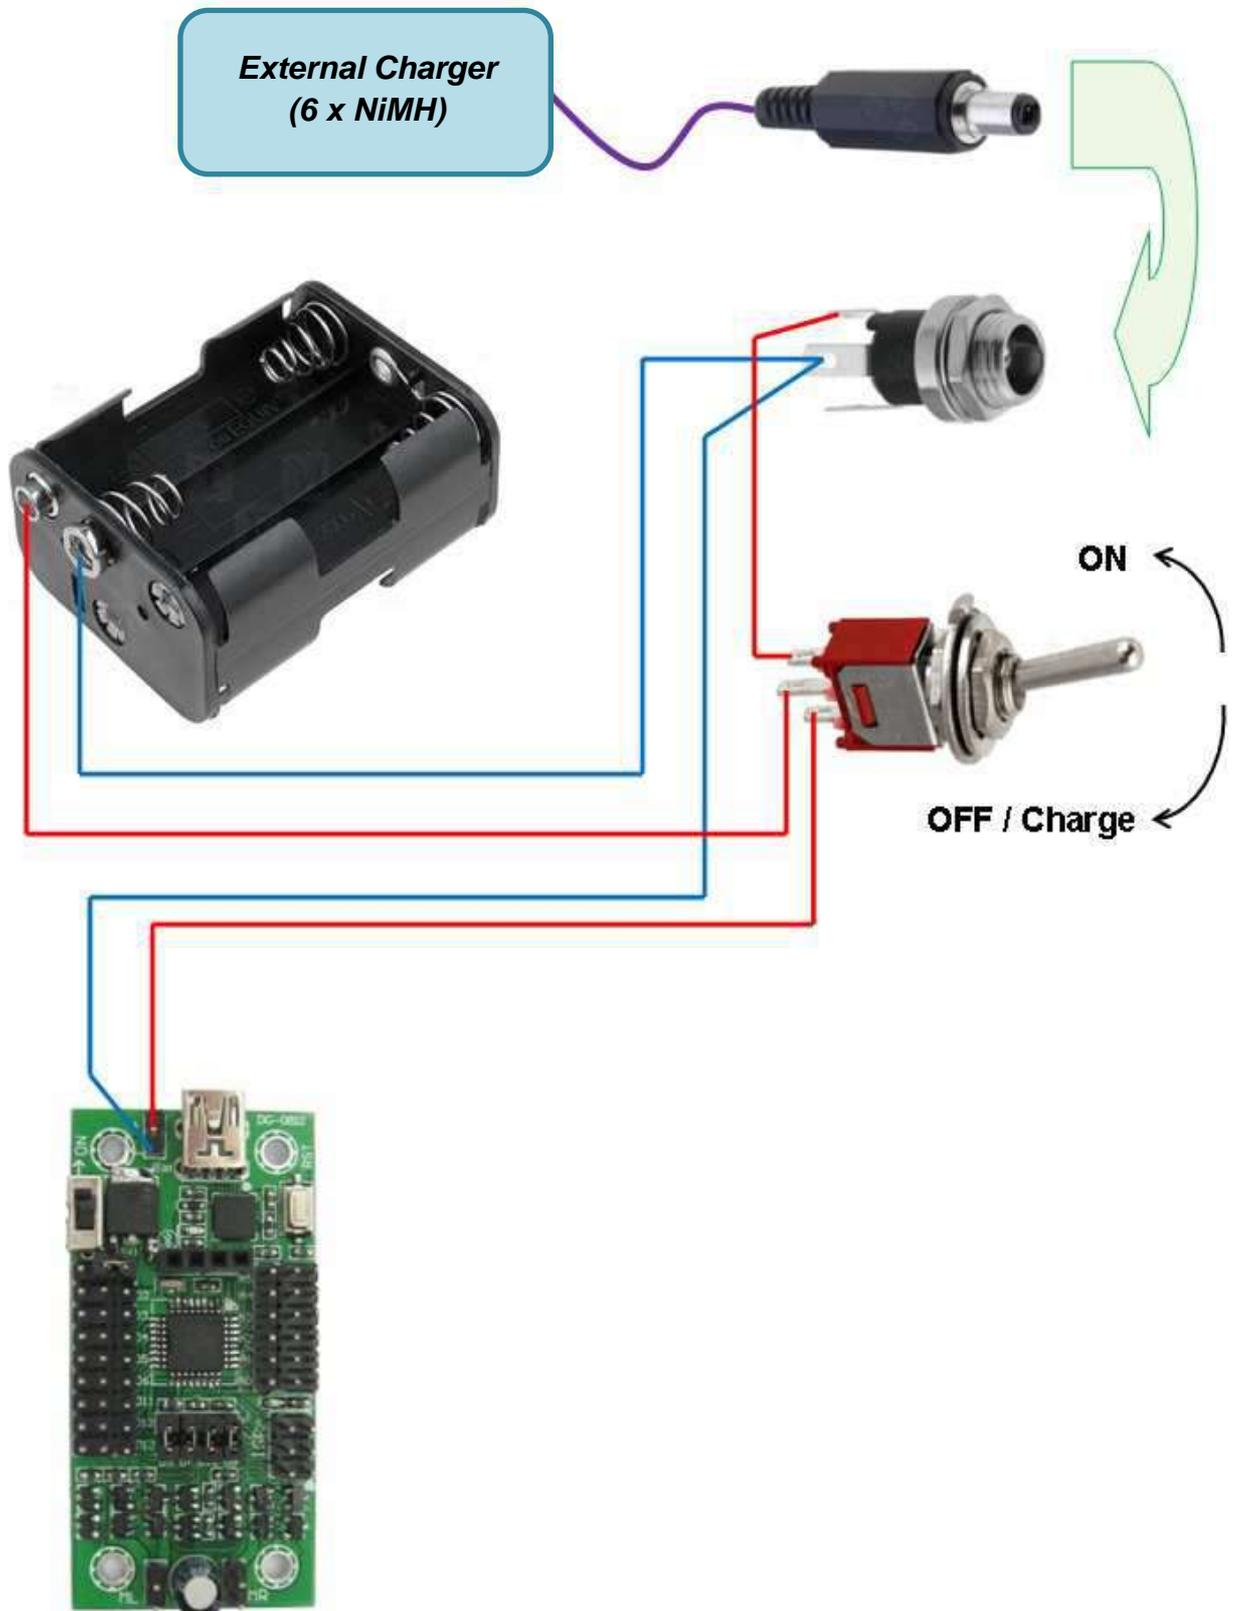

## Educational mini-robot platform

with the Raspberry Pi computer, camera and ultrasonic distance sensor

# AMRobot

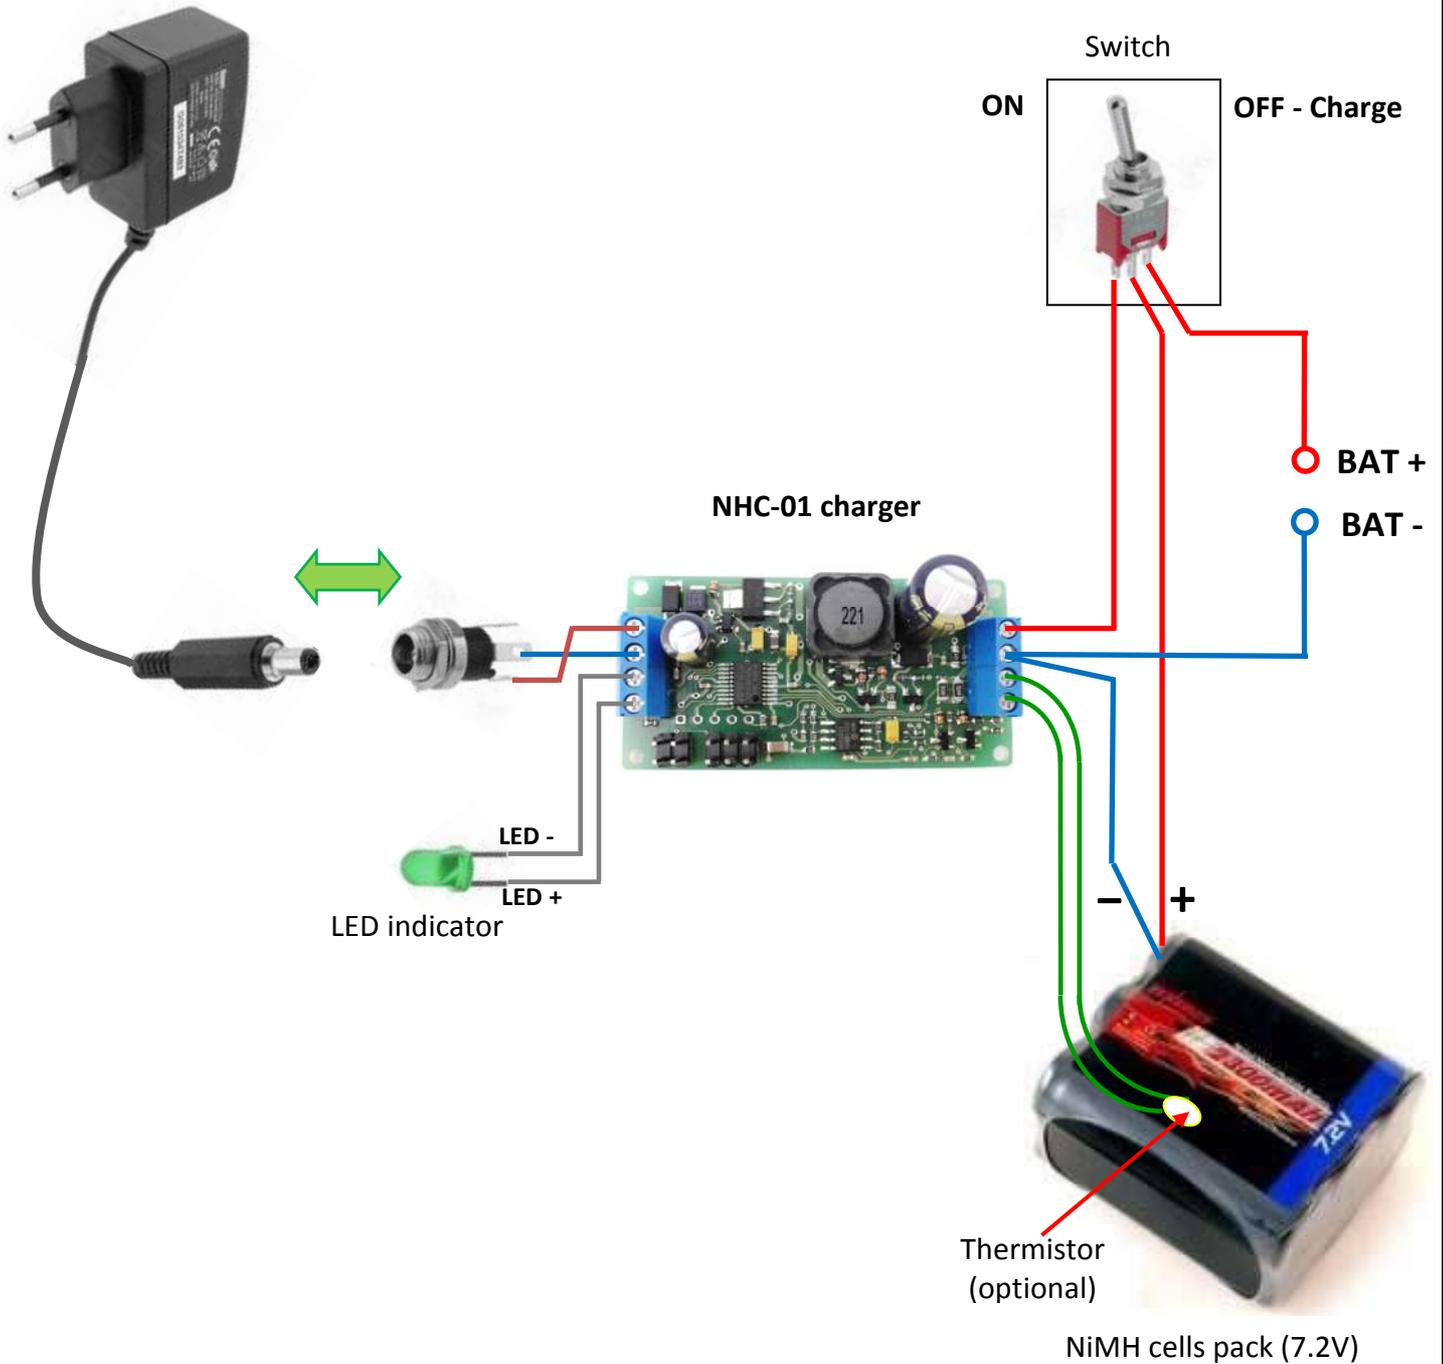

## Schematic diagram of DAGU Mini Driver and external Charger

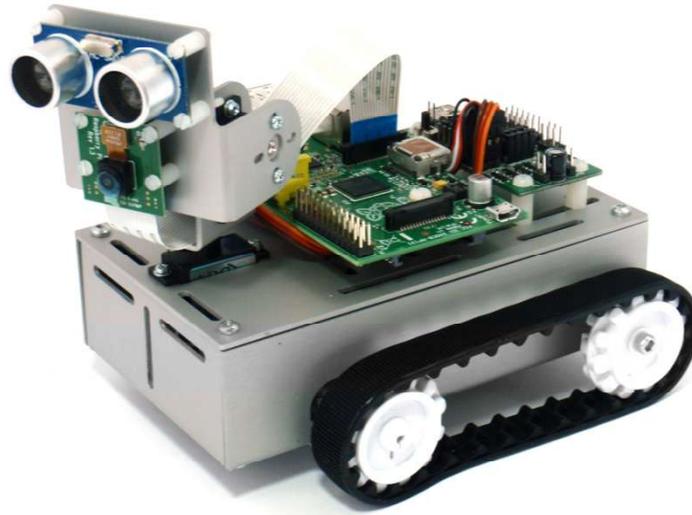

# AMRobot

*Schematic diagram of the charger (embedded to AMRobot), external power supply, power supply connector, NiMH battery pack, thermistor, LED diode and a switch*

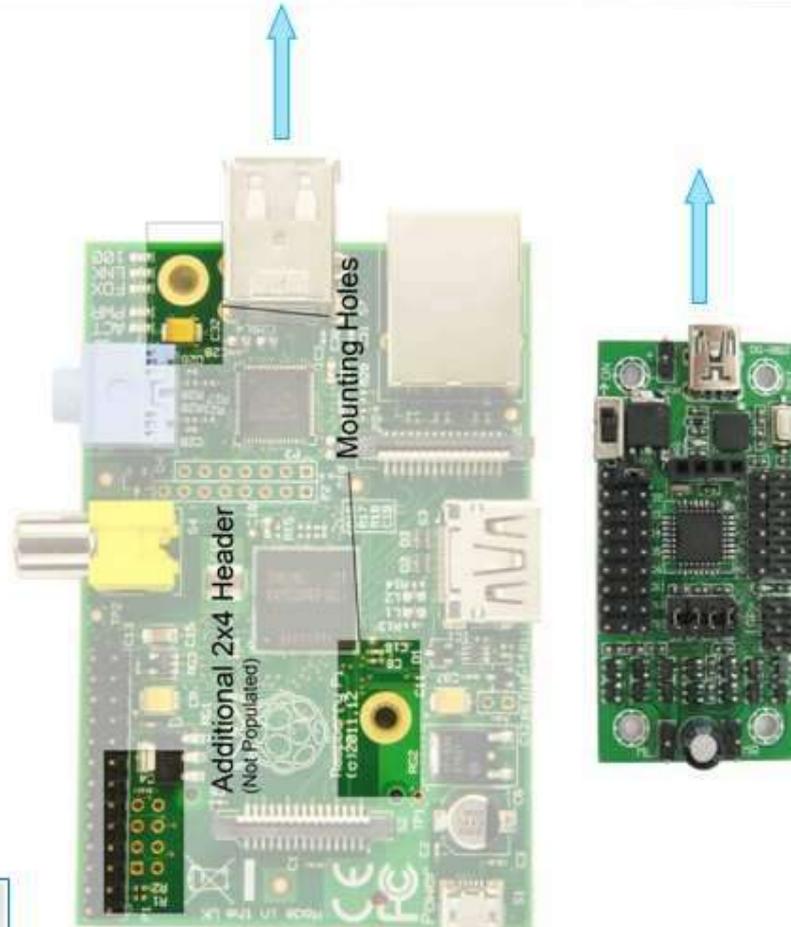

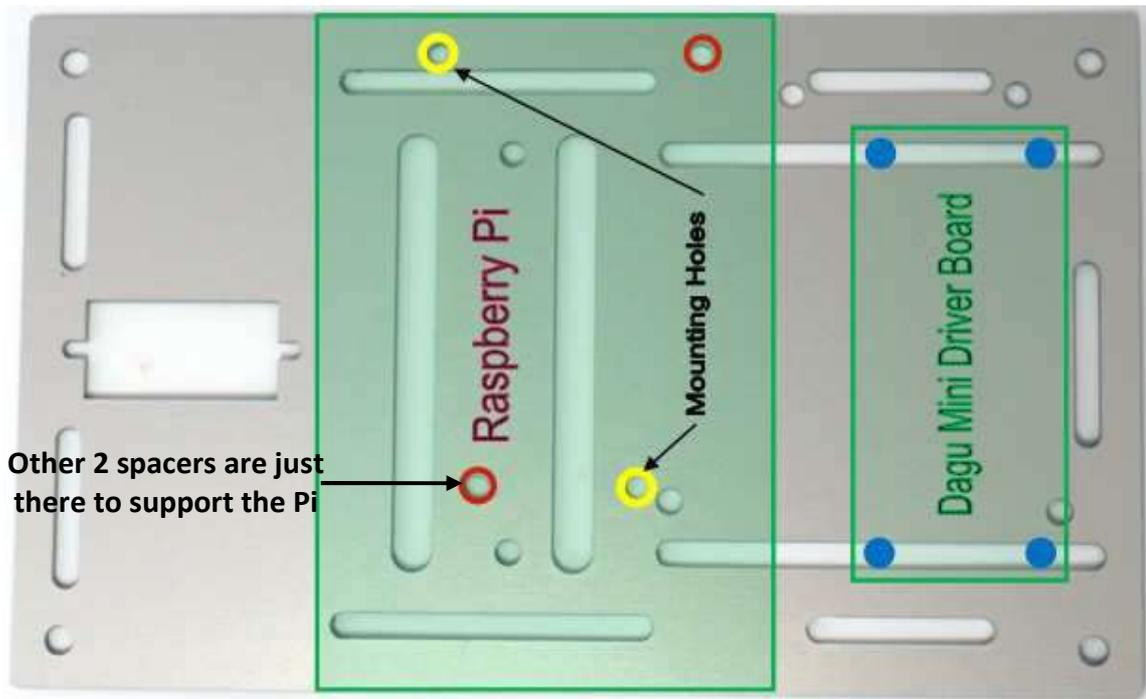

Stabilized power supply  
(230VAC/12..18VDC, 1.5A)

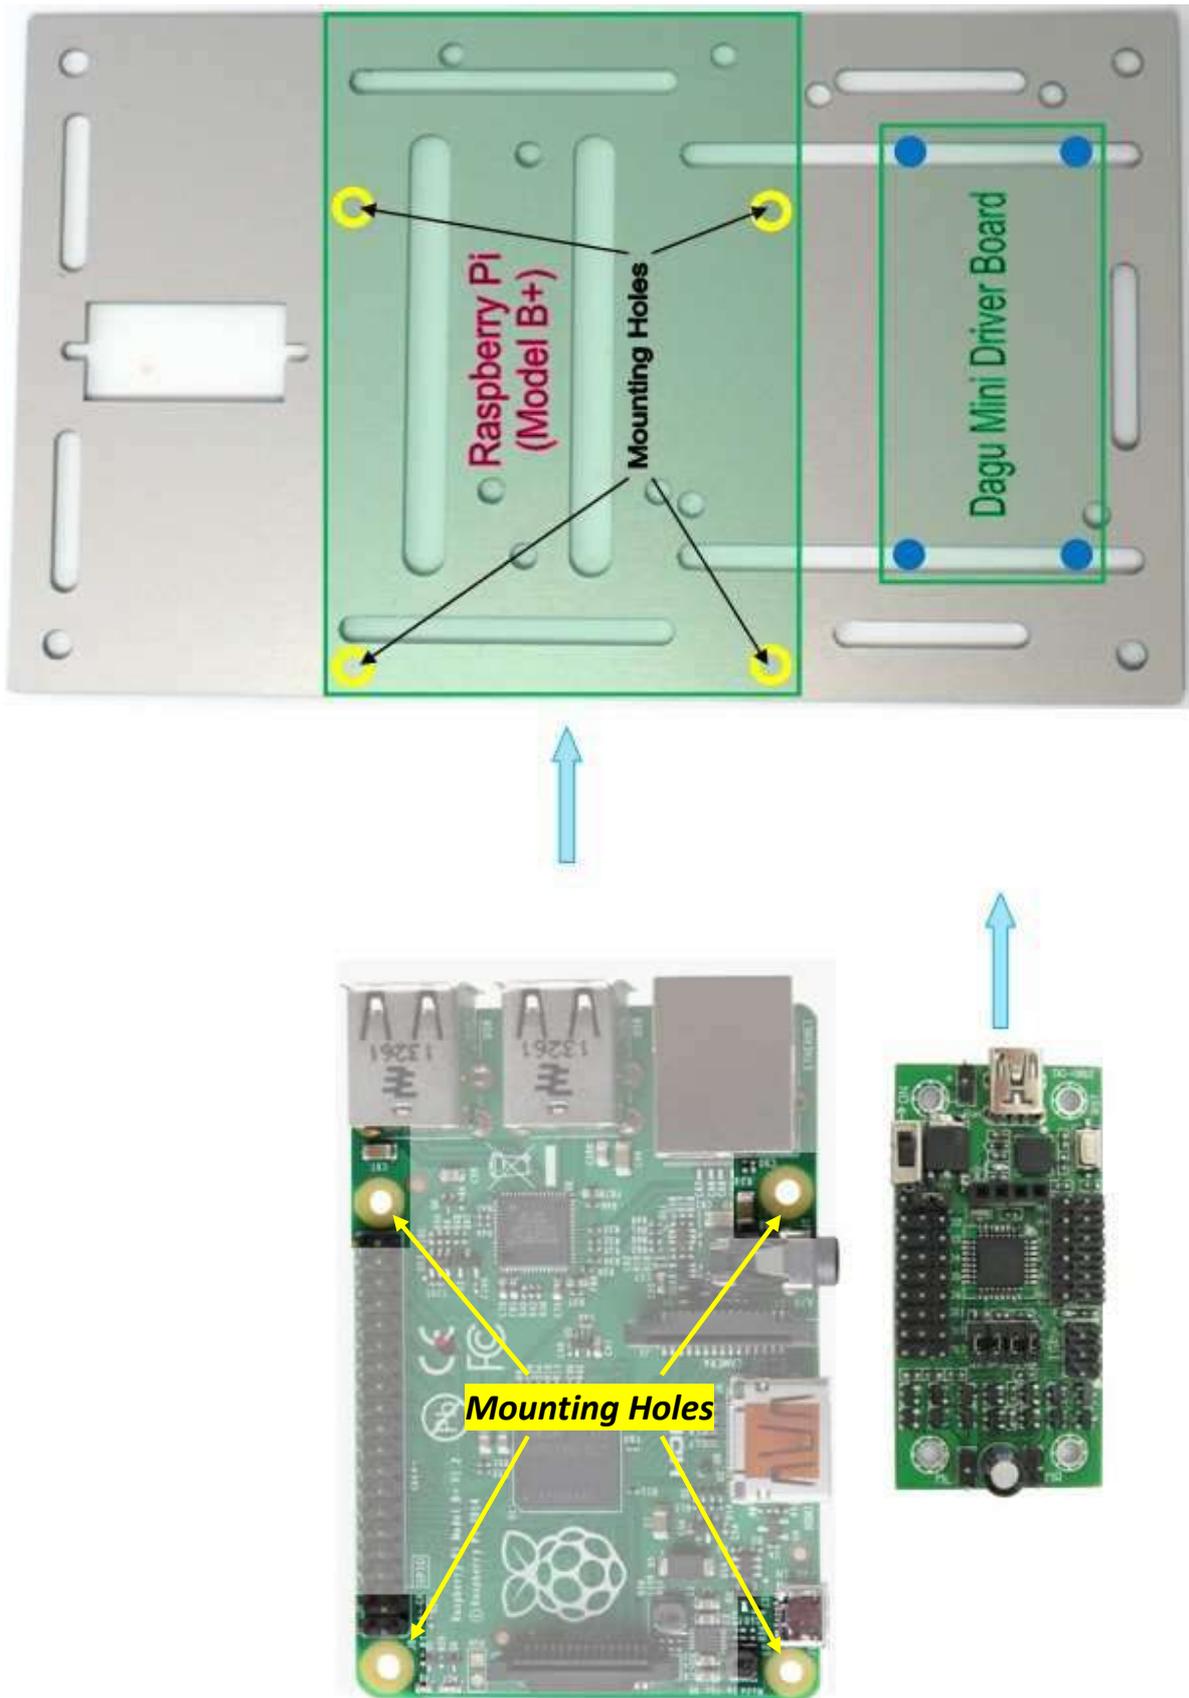

## AMRobot chassis with the Raspberry Pi (Model B and Model B+) and other Modules

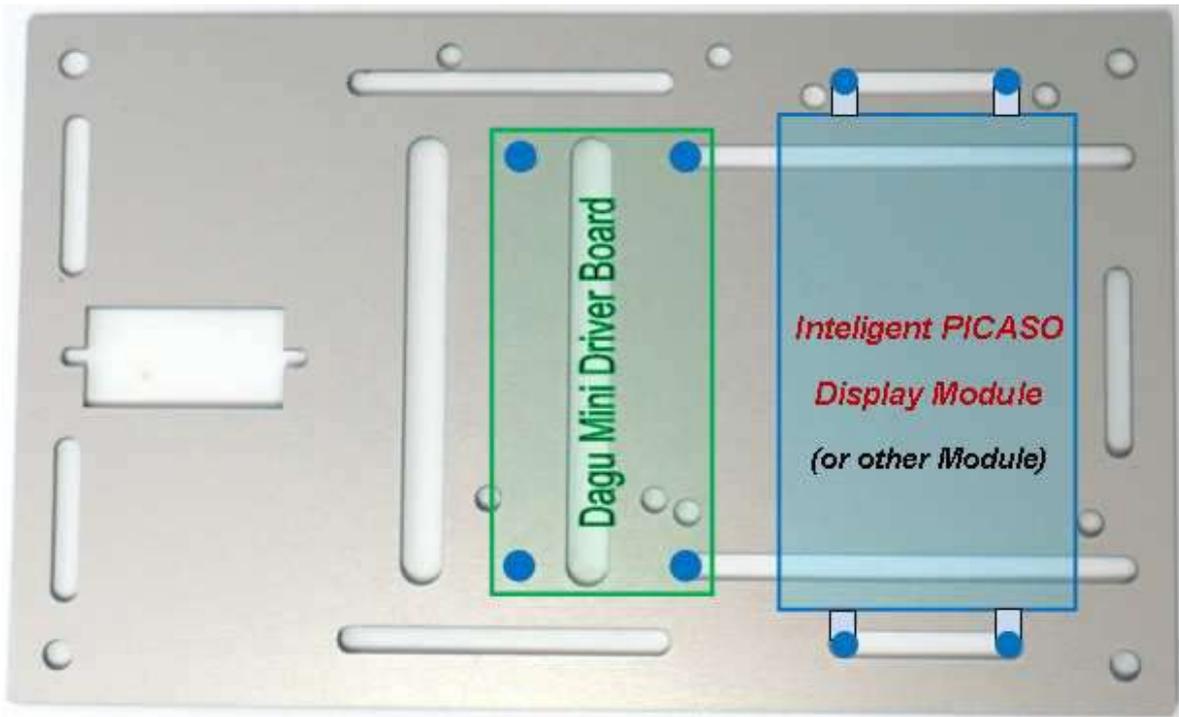

## 1. RASPBERRY Pi (model B), DAGU Mini Driver Board

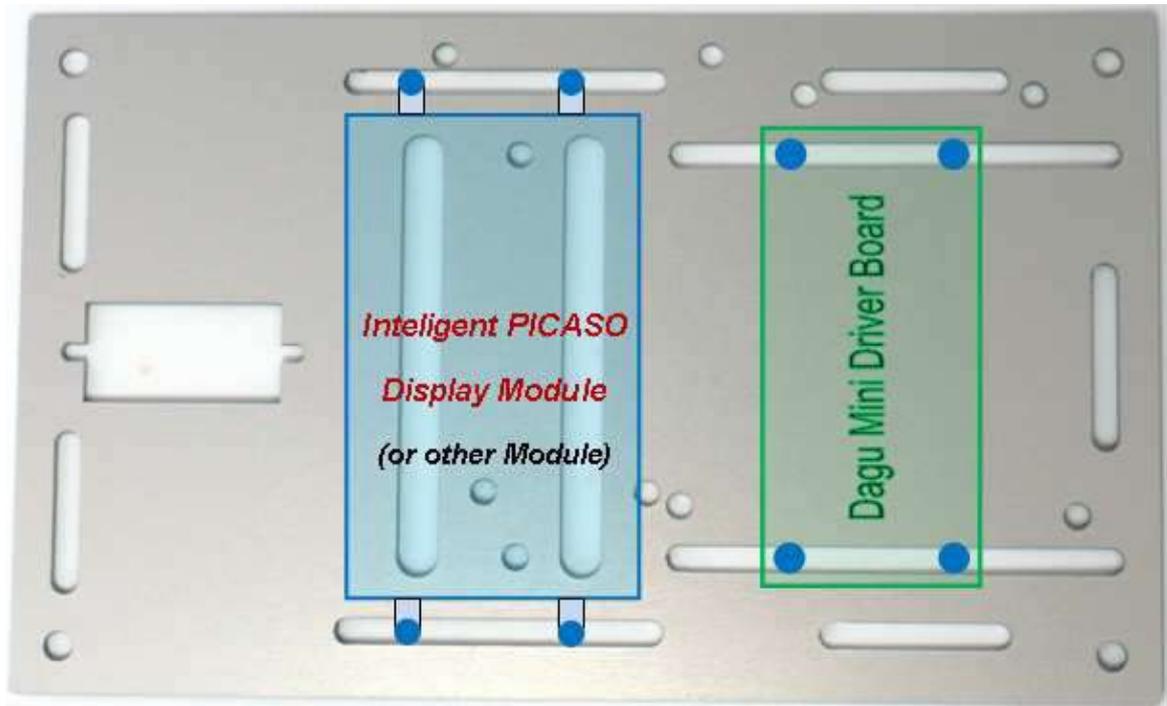

## 2. RASPBERRY Pi, (model B+), DAGU Mini Driver Board

### 3. DAGU Mini Driver Board, Intelligent PICASO Display Module (v.1)

## 4. DAGU Mini Driver Board, Intelligent PICASO Display Module (v.2)

## 5. ARDUINO Leonardo + ADAFRUIT Motor Shield, Intelligent PICASO Display Module
